Congruent

*"If I have not mentioned it before please note that Siva & his team have done a fantastic job of identifying our business needs at a granular level, as well guiding us through high-level more complex infrastructure decisions. We are all excited to see the project move forward and are looking forward to building upon what is already a wonderful relationship with the team @ Congruent!"*

Tania Denny  
Project Leader

*"I have to say I have been very happy with my interaction with your team. Siva is very responsive and knowledgeable, we are meeting our timelines and he is always on top of any issues that arise. Hari has been a great resource as well, very skilled and always attentive of the business needs and proposing solutions."*

Nohemi Feltl  
Enterprise Content & Business Technology Manager

# Why is intranet very important for employee productivity?

51%

51% of employees don't like to share documents because they find it too difficult to locate it

60%

60% of important information is missed because it was shared through phone or in-person

57%

57% of employees use applications that are not approved by their company, for tracking daily tasks

60%

60% of the time are spent in email management, meeting, and information search due to a lack of proper information system

15%

Globally, only 15% of the employees are completely engaged with their tasks

**Congruent**

With the massive amount of information flowing into the business, information management is so vital for its success. A simple SharePoint intranet with all the necessary features should help any organization overcome its collaboration challenges.

A SharePoint intranet with the right features can,

- 01 Streamline business process or approval process
- 02 Encourage communication between employees/department and prevent information silos
- 03 Save employees from long hours of information search
- 04 Streamline task management
- 05 Increase employee productivity through effective time management

# We build intranets that foster innovation and engagement

Better Communication

Seamless Collaboration

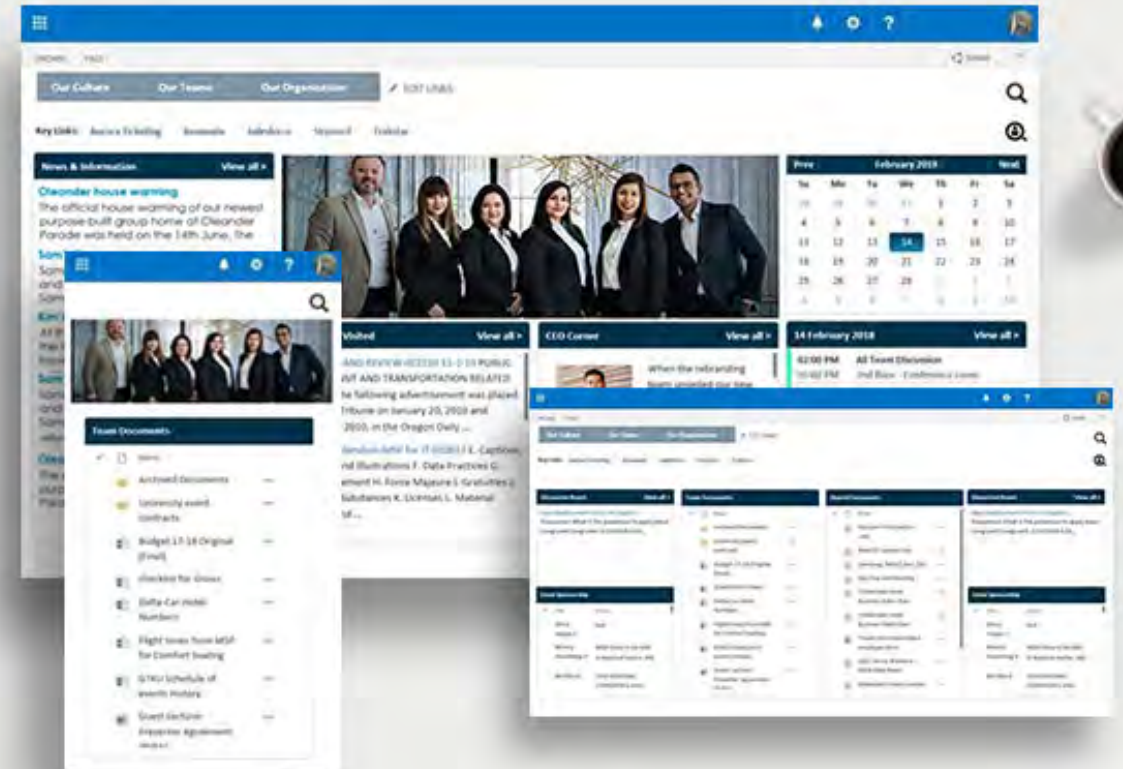

Increased Engagement

Higher Productivity

Consistent with your branding
