

# Business Brainstorming Cloud Solutions Assessment

Our Business Brainstorming assessment is designed to help your team discuss your organization’s current business processes and ways to improve or automate them using Microsoft 365 cloud technology.

### What to Expect:

In this one-hour remote assessment, a Regroove business solutions analyst will lead your small group through a brainstorming session and provide guidance on how to improve your business practices.

## Get clarity on the cloud

This session is designed to provide clarity around business processes in your organization and determine how to improve or automate them using Microsoft 365 tools.

Our team will provide recommendations that enable you to take the next step and do more in the cloud!

### Increase collaboration

Discover ways to help your team communicate and collaborate, ensuring your team can work from anywhere. We’ll discuss how your team currently works together and how implementing Microsoft Teams and an engaging intranet with SharePoint Online can help.

### Implement automation

Automate simple tasks, Team and site creation, reminders, file management, and more! We’ll discuss what tasks and processes are currently bogging down your team and how automation can help increase your productivity.

### Visualize data

Take your data to the next level with up-to-the-minute, intuitive displays that provide quick insights into your business. We’ll discuss what data is most important to your business and how to create visual dashboards that ensure generating insights from your data is easily accessible.

“Regroove came up with creative solutions for things that I hadn’t already thought of. They worked to interpret and understand our requirements so they could come up with creative solutioning that actually fits our needs.”

- Dawn Christenson, Director of Finance, Town of View Royal
