CybergymIEC

Founded in 2013, Cybergym is led by a team with decades of experience working in and for the Israeli security forces and eliminating cyberattacks on one of the world's most-targeted organizations, the Israel Electric Corporation (IEC). Recognising that people – both at management level and in the general workforce - lack awareness and understanding about how to identify, detect, respond to and recover from a cyberattack, we have devised a unique methodology to upskill people across organizations, in a range of industries and sectors.

We are Crest certified

CREST.

We can help you prevent up to 90% of cyberattacks on your organization, contact us at:
