Trust ClearDATA with your next **Security Risk Assessment**

ClearDATA SRA

Healthcare providers that participate in the Merit-Based Incentive Payment System (MIPS) must comply with a requirement to protect patient health information with an annual security risk analysis (45 CFR 164.308(a)(1)). Failure to do so could result in a reduction in your reimbursements and negative impact to your reputation.

How can you defend vulnerabilities you don't fully understand?

While free resources and tools are available, they require IT staffers to have a detailed understanding of both HIPAA Security Rule and of the changes to web services used by developers. Any gaps could result in risk to ePHI.

ClearDATA's SRA service helps organizations meet their annual HIPAA compliance obligation. ClearDATA Privacy & Cybersecurity experts have years of experience and hold certifications such as CISSP and GDSA. And we are a cloud-native with expertise in Azure. ClearDATA's SRA is based on the OCR's Guidance Document (Office of Civil Rights) and is a thorough review of your organization's risk based on HIPAA Security and Omnibus Rules.

To maintain compliance throughout the year and ensure risk management is applied to any new strategic initiatives, ClearDATA Policy-as-Code provides services and technology to reduce the identified risks to reasonable and appropriate level (45 CFR 164.308(a)(1)(ii).

The SRA service focuses on a review of all HIPAA Security Rule Standards and Implementation Specifications for healthcare covered entities and business associates. • Security Management Process • Security Incident Procedures • Assigned Security Responsibility Contingency Plan **Administrative** • Workforce Security Evaluation Safeguards • Information Access Management • Business Associate Contracts • Security and Awareness Training • Facility Access Controls Workstation Use **Physical** Workstation Security **Safeguards Data Integrity** • Device & Media Controls Confidentiality Access Control Audit Controls **Availability Technical** Integrity **Safeguards** Person/Entity Authentication Transmission Security • Requirements for Group Health Plans Organizational • Policies and Procedures Requirements Documentation

Why do CISOs and their organizations choose ClearDATA SRA?

- 1 ClearDATA's SRA follows the OCR (Office of Civil Rights)
 Guidance Document for completing the SRA.
- 2 ClearDATA's SRA meets the Macra/MIPS Advancing Care requirement.
- In the event of an OCR "Reportable Breach", your organization's latest SRA will be reviewed by the OCR. With a ClearDATA SRA, we stand beside you.
- **4** ClearDATA's SRA is a true consulting engagement supported by our Assess platform.
- **5** ClearDATA has performed hundreds of SRA from Integrated Delivery Networks with dozens of clinics to standalone Medical Centers and clinics.

Cloud Catalyst. Healthcare Protector.

We are Healthcare's largest managed cloud and security provider, enabled by our powerful CyberHealth™ platform. Our solutions operationalize compliance, privacy and security for the healthcare ecosystem in the public cloud.
