

Azure Migration Assessment

About Migration Assessment

Migration Assessment is a prerequisite for moving your infrastructure and applications to the cloud. Learn how your infrastructure can benefit from Azure, and prepare efficiently for Migration with our 8-day Azure Migration Assessment.

The assessment reviews your current computing infrastructure, identifies opportunities for savings, provides an outline of alternatives, and shows how you can migrate with minimal disruption to your business.

The goal of our 8-day Azure Migration Assessment is to:

Validation of It Infrastructure

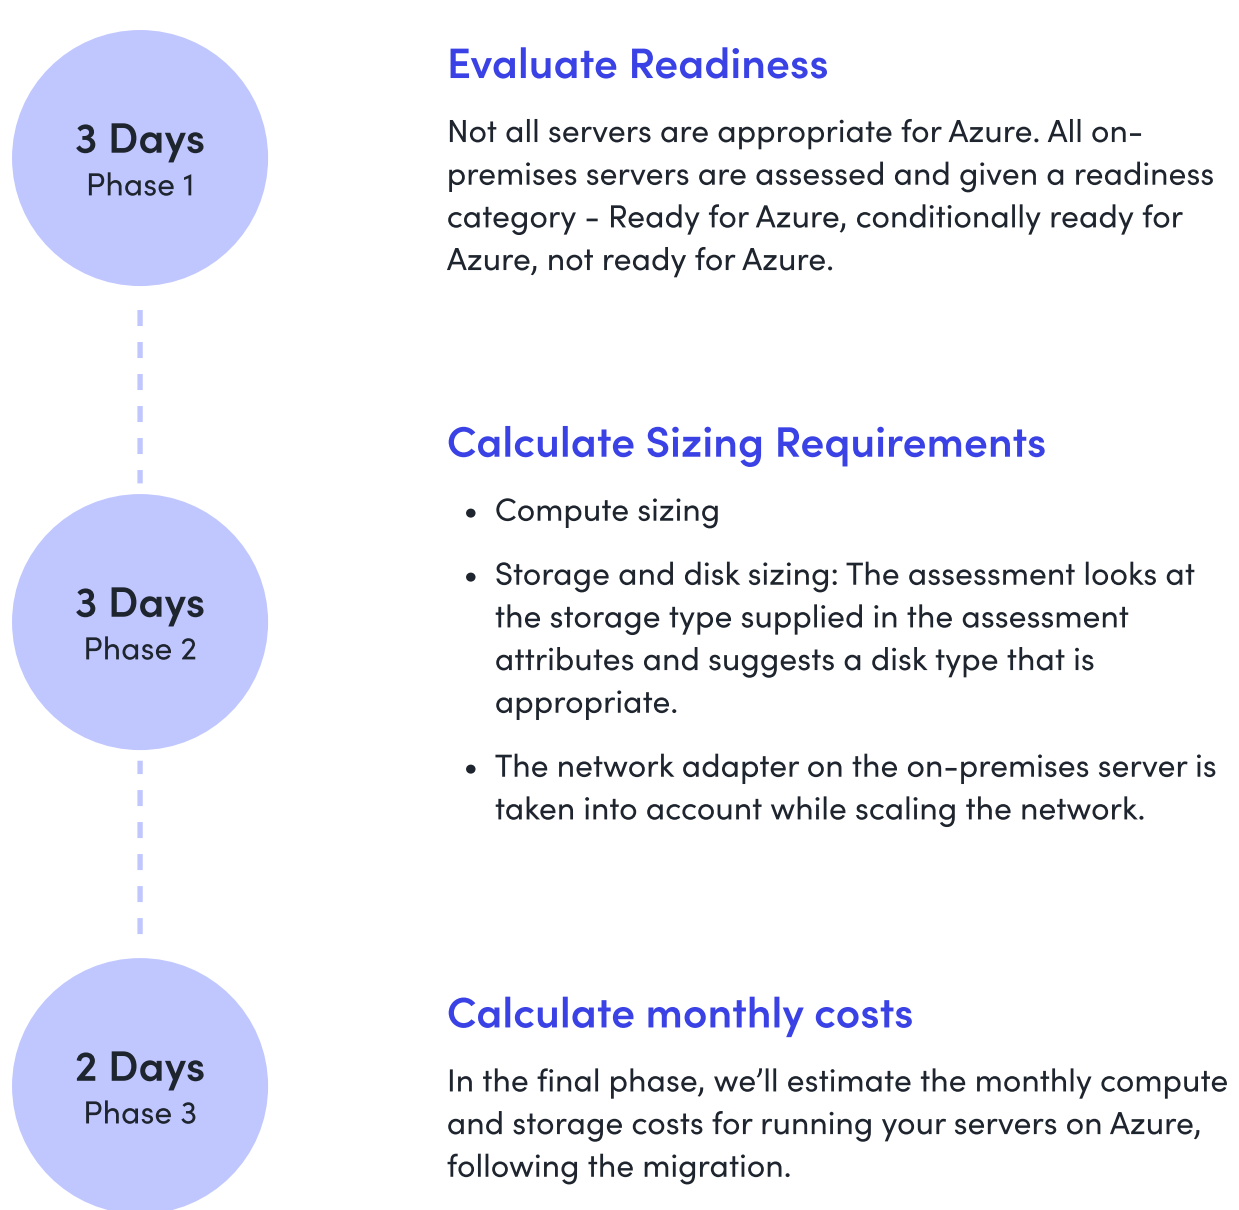

Validate your current IT infrastructure for optimal use of Microsoft Azure.

Collection of Information

Identify where your applications are running, what you're paying for, and whether there is a better performance or cost option with Microsoft Azure.

Best practices indicate that a migration assessment should be done before any company switches from its current hosting provider to the cloud.

The Assessment Process

Deliverables

Here's what you should expect at the end of our 8-day migration assessment:

- Azure Migration Assessment Report**

Explores the technical and business benefits of moving from on-premises infrastructure to the cloud, without needing to make substantial investments in new skills or capital.
- Detailed Roadmap**

A detailed roadmap providing guidance on how to efficiently migrate to Azure.
- Recommendations for Migration Needs**

Sizing, security, and storage recommendations for your migration needs.

Let's build better solutions together!
