

Supercharge Your Media Delivery

Viewers and listeners don't have the patience for streaming rebuffers. There's no forgiveness for your network's congestion, delivery or demand challenges.

Global CDN

Edgio delivers robust file and software downloads and streams the highest quality video through its massive, private, globally-distributed network and advanced Edge caching. We are proudly ranked as **the world's fastest CDN**.

Benefits

Join the world's fastest network

We are consistently ranked #1 and #2 globally for low-latency.

Remove rebuffers & slow downloads

Cache and store objects at the Edge to improve delivery performance.

Deliver to every device

Content flows through OTT, IOS, Android, PC, tablet & wearable devices.

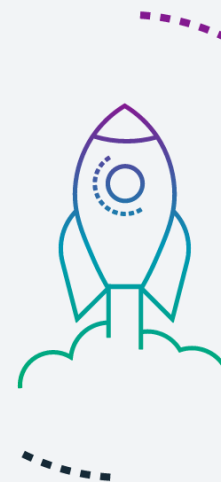

Stream media in real time

Edgio supports live events & delivers the most up-to-date content.

Run on the fastest network

Low bandwidth and limited availability are a drag. Connect to more than 1,000 ISPs and leading public cloud providers on the world's **lowest-latency global CDN**.

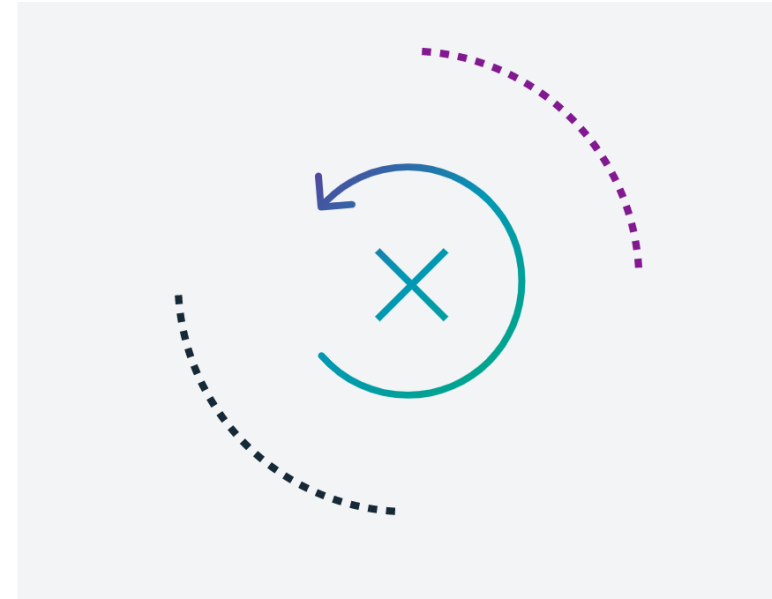

Establish global coverage

Bypass internet congestion. Edgio operates one of the largest private networks in the world, with more than 300 Points of Presence (PoPs), 200 Tbps global capacity, and 7,000 global interconnections.

Purge for performance

Serving users stale or damaged content can severely compromise your media brand. Purge data rapidly in real-time and at a global scale – so that users are never served stale data.

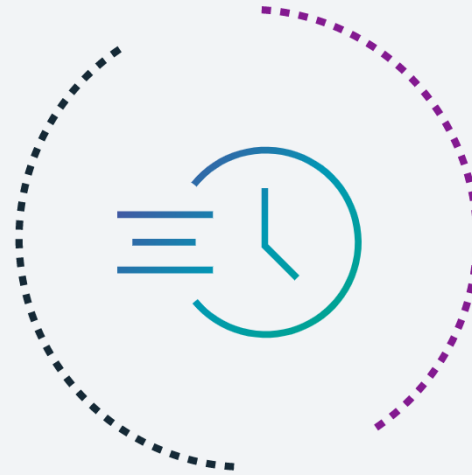

Ensure the fastest file retrieval

Slow retrieval from origin storage can cause video on demand and audio lag, and sluggish downloads. Edgio places content and software & file downloads close to your audience, and retrieves it from the fastest location, for a 100-200% faster performance.

Accelerate your last mile

Poor internet connection doesn't have to mean slow content delivery. Edgio offers a variety of techniques, including rate limiting, TCP optimizations, compression, and persistent connections to speed **content delivery** to the client from the CDN edge.

Access download analytics

Plan ahead. We provide an easy-to-read dashboard for data and stats including download completion rates, download receipts, and traffic patterns.

Fast, reliable and secure private global network

Edgio's network has the connectivity, network bandwidth, and compute capacity to support the most demanding media services.
