Epic on Azure: Plan Your Journey

Topics

- **O1** Healthcare Trends
- ©2 Epic to Azure Approach
- 03 Kyndryl Healthcare Capabilities

Digital transformation initiatives have been accelerated and prioritized

Vaccine registration, virtual care, Covid tests and vaccinations, converting clinical and outpatient spaces for surge, work-from-home – caregivers are under increased pressure to deliver more

Pressure on legacy systems

Unprecedented demand for services, rethinking approaches to scalability and resiliency

Scarce resources amid rising demand

Expected global shortage of healthcare IT and clinical professionals

Revenue challenges for traditional providers

New market entrants will siphon over \$200B¹ in revenue from traditional providers over next 5 years

Dynamic regulatory environment

32%² of healthcare executives say top concern is "complying with changing policies"

Consumer experience expectations

89%³ of consumers say they believe the healthcare system needs an overhaul

Escalating and nonstop cybersecurity threats

Ransomware and other attacks threaten exposure of patient data and impact operations and brand trust

Barriers to cloud are being eliminated and have provider CIO's looking for "fit for purpose" cloud on their journey to modernization

The "great resignation" and location liberation has led to increased staffing and skills shortages in healthcare IT

Shift from CapEx to OpEx with consumption-based business model

Focus on resiliency and responding with greater IT agility

Embrace innovation in an accelerated way & leverage industry investments born on the cloud

Investments by cloud providers in HIPAA ready & HITRUST, availability and performance can support modern EHR

Reduce the operational burden of maintaining physical data centers

Overview of our methodology

We will work with you to create a phased plan that meets your priorities and objectives. We propose beginning with a straightforward pilot to prove out the approach

- Understand /
 confirm your
 Objectives and
 Priorities
- Select the Use
 Cases that align
 with your
 Objectives and
 Priorities
- Model a Phased
 Plan that meets
 your needs

Partner with
Azure Epic
Team

- Begin with a **Pilot** to demonstrate your objectives will be met
- Prepare a Solution
 Design based on
 your specific
 environment and
 your Epic Cloud
 Specification Guide
- Ensure Azure & Epic support for the Solution Design
- 8 Establish a Financial Model that demonstrates cost savings and predictability

A tailored three phased approach for Epic to Azure

Phase 1

✓ Training

- → Get experience with near-complete Epic environment in the cloud
- → Not patient-care critical
- → No PHI
- → Scheduled usage lends itself to spin up / spin down

Phase 2

- ✓ Training
- ✓ Alt Prod

Phase 3

- ✓ Training
- ✓ Alt Prod
- ✓ Non-Prod
- ✓ Production

Workshop structure and work products

Approach to start your journey for Epic on Azure that meets you where you are

Structure of workshop

- Review critical business metrics
- Verify which Epic modules are implemented
- Define phased approach to Training, Alt Prod, Non-Prod, Prod
- Review technical requirements to include compute, storage, network, security
- Review standards and tooling
- Review policies and risk tolerance
- Clarify cloud strategy and growth
- Document desired timelines and dependencies
- Review governance and processes
- Build plan to address your organization's ability to absorb the changes that cloud will bring
- Determine goals, outcomes and guiding principles (e.g., reduce CapEx, increase agility), driving the move for Epic on Azure

Takeaways & Work Products

- Tailored phased approach for Epic to Azure
- High-level plan to move Epic to Azure
- Next steps for Solution Design and budgets

Known for:

- Trusted by customers with vital systems
- Deep domain expertise:30+ years of IT services eminence
- Recognized leader by industry analysts
- Innovating at scale with intellectual property and portfolio of 3,000+ patents
- Largest infrastructure implementation and managed services provider

Added value as Kyndryl:

- Unleashing our full potential with partners to deliver outcomes for customers
- Expanding investments in skills and innovation our customers need
- More nimble and responsive with decision-making close to customer

day.

Kyndryl: 30+ years of designing, building and managing mission-critical IT environments for our healthcare clients

Our people:

> 90,000

Skilled professionals

247,000

Skills badges earned, including:

61,000 in cloud

43,000 in agile

43,000 in analytics

42.000 in Al

38,000 in Design Thinking

31,000

Vendor-recognized certifications in Microsoft Azure, VMware, Cisco, Red Hat, AWS and more

2.9M

Hours of training in first half 2021

Empowering thousands of customers

4,000

Global customers, including:

...of the Fortune 100 and more than half of the Fortune 500

Kyndryl offers a unique vantage point working with some of the largest firms in a complex healthcare ecosystem. We understand the end-to-end value chain:

- Healthcare providers
- Global medical technology
- Pharmaceutical companies
- Healthcare payers
- Revenue cycle management
- Healthcare IT

Providing undisputed leadership

6.1M mainframe installed MIPS

270K network devices managed

5,200+ WAN devices managed

67K+ VMware systems managed

14K+ SAP instances managed

3.5+ exabytes of customer data backed up annually

How we deliver

An integrated portfolio of solutions to help you reach your transformation goals

Core Enterprise Digital Application, Cloud Security **Network** & zCloud Data & Al & Resiliency Workplace & Edge Enable digital Manage mission-critical Enhance user Improve business Maintain business Prepare for the next wave of cloud with transformation with workloads seamlessly by experience and work outcomes through data continuity and a controlled, expertlocation flexibility by management and AIconstantly adapt to 5G-enabled edge and modernizing mainframes infused operations that software-defined new threats and led transition through to handle high-volume, providing a consumer cloud modernization experience to yield intelligent insights regulatory standards networking (SDN) always-on computing employees Customers **Integrated Services Professional Services** Managed Services Advise Move / Build Operate **Advisory Services Implementation Services Managed Services**
