

# No-Code Smart Workflows Application Builder

## Solution Description

ChainSys No-Code Smart Workflows Application Builder helps to create complex web and mobile applications along with workflows for enterprise applications such as Microsoft Dynamic, SAP, Oracle etc.

Our No-code Smart Workflows Application Builder creates bots to automate manual tasks so you and your team can focus on the work that matters most. Smart workflows are available for building connected applications with point and click configuration for your business application.

## Key Features and Highlights

- Workflows for Approvals
- Workflows for Data quality checks
- Workflows for managing the Business process needs
- Send and automate email, SMS, and Push notifications
- Call any web services events
- Call any DB Connect and post or pull data.
- Call any validation or transformation API

## Why use ChainSys for No-Code development?

The Chainsys Smart App Builder allows business users to create their own apps without having to rely on IT or consultants- making it easier to build software solutions

Included with a visual editor to build screens and navigation, and data integration adaptors for all your existing third-party tools, and comprehensive training resources to get you started readily.

ChainSys Smart App Builder also supports single sign on, so your business users can quickly adopt this application to improve the process.
