

MuleSoft to Azure iPaaS

Migration Assessment and Roadmap

Migrate your MuleSoft integration platform to Azure iPaaS to discover the benefits of Azure services.

The 4-week migration assessment and roadmap strategy includes reviewing the existing MuleSoft environment and planning a roadmap for re-platforming to Azure iPaaS economically and efficiently.

Business Case

Modernize on-premise MuleSoft environments to cloud

Migrate legacy MuleSoft platform (nearing end-of-life)

Optimize cost for integration platform

Unify business application solutions on cloud

Key features

Create a feature-to-feature comparison report between MuleSoft and Azure for the existing solution

Prepare a capacity planning report based on the current and expected transaction volumes

Build desired solution architecture with multiple pricing options

Evaluate detailed migration and recurring infrastructure estimates

Provide adaptable cloud native and cloud agnostic solution designs based on customer requirements

Perform gap analysis coupled with mitigation plan

Develop migration road map and MuleSoft retirement plan

Provide seamless migration with custom tailored consulting services

Benefits

Reduce integration platform cost by **50-70%** yearly

Recover migration investment within a span of **3** years

Save on premium resource billing rates

Leverage on skilled resources for development and maintenance effortlessly

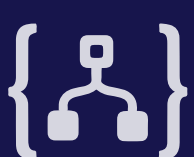

Accomplish enterprise business requirements with easy and out-of-the-box integration within Azure ecosystems

Utilize Neudesic's extensive expertise in Azure

Built on Azure iPaaS
