

Get ready to transform with a clear vision for the future.

Most organizations see the benefits of the cloud as it delivers greater agility, flexibility and innovation. However, uncertainty remains in how to get there with minimal risk and cost.

96%
of organizations
use cloud in
some form.

82%
of enterprises
say cloud spend
is a concern.

83%
of enterprises
indicate security
is a challenge.

A successful journey starts with a clear path ahead.

Transforming your business with Microsoft Azure in a fast, cost effective and secure way, begins with a cloud readiness assessment. It removes uncertainty in your cloud journey with a detailed analysis of your current state and a clear migration roadmap with associated costs.

Environment analysis

We conduct a thorough analysis of your current technology landscape and current capabilities to determine what workloads should be running in the cloud.

Cloud strategy

We determine the right strategy for Microsoft Azure implementation and workload migration; so you can avoid the roadblocks, and risks to maximise the cloud opportunity.

Cost estimation

We provide you with an upfront indication of the costs involved; so you have a firm idea about the level of commitment and investment required to achieve your objectives.

Accurate. Fast. Trusted.

Our proven approach has been tried and tested, is highly accurate and can be turned around at speed.

Accurate

<2%

is the average margin of error in cost.

Fast

2 weeks

is the usual time it takes for completion.*

Trusted

400+

is the number of Cloud Readiness assessments conducted.

Take your first steps towards transformation at scale.

The cloud readiness assessment is just the start of our three-step approach to help you plan and execute a successful cloud strategy.

Step 1: Align

You are here!

We can also perform an assessment for security and compliance.

- ▶ **Cloud readiness assessment**
- ▶ Cloud security assessment

Step 2: Transform

The next step

Implement a Production Ready Cloud and migrate workloads.

- ▶ Platform implementation
- ▶ Workload migration

Step 3: Scale

For the future

Continually innovate at scale with managed services.

- ▶ Ongoing innovation
- ▶ Managed services

Are you ready to transform? Let's get started.
