

AI Driven Smart Application Builder

Solution Description

ChainSys AI Driven Smart Application Builder helps to create a secure AI Application in minutes. Use our pre-built templates and drag and drop widgets to quickly configure your apps. No code required. Just select the model features and data visualizations you want your consumers to use in their decision making process. Our responsive design enables you to build your application then preview and run it at any resolution or any device- including mobile and tablet.

Key Features and Highlights

- Incorporate machine learning models like intelligent document processing and optical character recognition
- Neural machine translation service integration that delivers fast, high-quality, and affordable language translation
- AI based smart workflows
- AI based insights for all your screens
- AI Dashboards for all you business data

Why use ChainSys for No-Code development?

The Chainsys Smart App Builder allows business users to create their own apps without having to rely on IT or consultants- making it easier to build software solutions

Included with a visual editor to build screens and navigation, and data integration adaptors for all your existing third-party tools, and comprehensive training resources to get you started readily.

ChainSys Smart App Builder also supports single sign on, so your business users can quickly adopt this application to improve the process.
