

Fleet and asset management

Ensure optimal use of your vehicles and machinery

Take full control of how your corporate cars, trucks, machines as well as other assets are used.

Cloud based solution with web and mobile applications enabling fleet managers and management to continuously monitor and optimize usage of corporate assets. Know the status of all assets in real time, get notified in case of problems or non-compliance with work processes, award the best drivers, ensure timely servicing and prevent misuse. Integrate with your ERP to further streamline work processes and achieve KPIs. Powerful reporting.

Why customers use fleetNET

- 24/7 monitoring of vehicles and machinery
- Ensuring compliance with work processes
- Ensuring timely servicing
- Preventing misuse

Real time insights

- Continuous, real time monitoring
- Status of assets with operational parameters
- Get notified in case of issues

Dashboard view of the complete fleet with status of each asset

Reduced costs

- Avoid unnecessary cost due to late servicing
- Motivate employees to use vehicles and machines efficiently, prevent misuse
- Optimize use of resources based on field activities

Cost reduction as high as 30%

Secured data

- Deployed on MS Azure for security and reliability
- On ours or yours cloud subscription for increased control of private data
- GDPR compliance

Have full control of where your data is stored and how it is managed

Thanks to the rich functionality of fleetNET we were able to rapidly grow our business and increase the number of vehicles and corporations to which we provide fleet management services, including mobile operators.

- Predrag Milicevic, CEO, PureGreen

How fleetNET works, to achieve business benefits

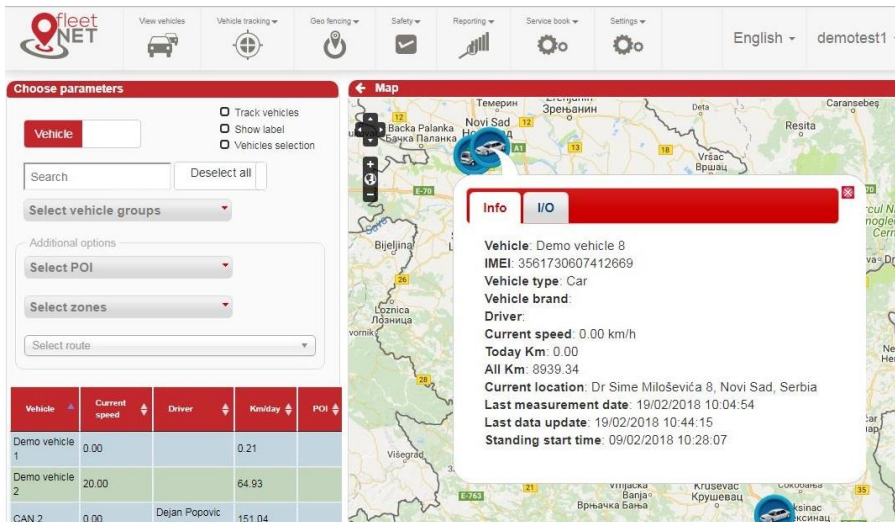

Ecosystem
