

Tableau to Power BI Migration ROI Calculator

A key consideration for businesses while migrating from Tableau to Power BI is the cost of migration. Organizations want to look before they leap and understand the costs involved in migration and the expected total cost of ownership (TCO) involved.

PowerAssist™ is a free-to-use Tableau to Power BI migration calculator that estimates the equivalent Power BI costs based on user inputted Tableau licensing and reports complexity details. It helps calculate potential savings, payback period, ROI, and provides a graphical representation of cumulative cost comparisons of Tableau vs Power BI including migration costs.
