

CDW SERVICES:

MICROSOFT AZURE GOVERNANCE WORKSHOP

PLANNING YOUR AZURE ENVIRONMENT FOR GOVERNANCE

Prior to Azure implementations, organizations need to have a cloud governance plan for their Azure environment. Cloud governance provides a way to look at the way organizations are implementing their cloud decision-making process, policies and criteria for planning, acquisition, deployment, operation and management of their cloud-computing environment.

WHAT CAN CDW DO FOR ME?

CDW will assist your organization in creating a plan for Azure cloud governance. This workshop, based on Microsoft Azure Governance principals, will help take an in-depth look at the people, process and technology currently in place and assist with building a framework that will make it easier for IT to support business needs while still providing the flexibility to use Microsoft Azure.

This engagement is for customers who have not established their Azure account/subscription. If the Azure environment has been established, CDW can assist with an Azure Design Assessment, to be done in conjunction with the Azure Governance Workshop.

A Microsoft Azure Governance Workshop will cover the following:

- Implementation of policies, processes and procedures
- Account provisioning
- Subscription controls
- Role-based access controls
- Resource management
- Policies and auditing
- Resource tracking
- Critical resource control
- API access to billing information
- Networking controls
- Security configuration, monitoring and alerting

CDW will present findings and recommendations and can assist with implementation as needed.

THE BENEFITS

- CDW will help your organization understand how to be in control of your Azure environment utilizing proper governance best practices.
- CDW consultants are experienced with assistance in designing and building Azure.
- Gain knowledge and insight on the best use of Azure according to your business goals and requirements.
- Learn how other customers are using Azure to cut costs and be more agile.

WHY CDW?

CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team providing the support you need, when and where you need it.

We can help you navigate Microsoft's robust array of solution offerings, including Microsoft Azure Storage. CDW is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer best-of-breed providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft Azure. And we can share our knowledge with you, so your organization can spend less time managing software and more time putting it to work.
