

Automate form & document generation.

# End-to-end Solution

**Capturing data to start the process.**

Document generation and digital signatures are the anchor leg of a process. Morf adds a world-class sprinter to the first mile.

# What is Morf?

**Let your forms  
build themselves.**

Morf skips the traditional form builder approach by using a simple syntax to automatically generate your form interfaces.

**Don't get caught  
comparing features.**

Morf consolidates all of your forms into a configurable and embeddable format while maintaining flexibility needed to connect data to systems.

# Turn a signature into a solution.

- ✓ **Flexible options**
- ✓ **Time to value**

Morf offers a fast and lightweight data capture tool for customers who have requirements or workflow needs beyond the current DCe offering.

# Who will benefit?

## Process Owners

Owner of content and process using desktop applications.

## Facilitators

Enabler of process using connected systems.

## End-users

Participant in process through exchange of data or signatures.

# Why don't we just **show** you.

Let's jump right in.

We could talk about it all day,  
but we would rather show you.

Questions?

# Why we built Morf.

## **Lack of options.**

The current forms landscape offers limited functionality or expensive customizations with nothing in between.

## **The wrong outcome.**

Form builders focus on the wrong outcome, facilitating the use of forms should be the goal.

## **The scale of the problem.**

document templates that need to be converted or updated is astronomical, stifling digital transformation.

# Flexible options.

**Convert, create, and  
embed beautiful form  
interfaces in your web  
experiences.**

- ✓ Generative UI inherits styles
- ✓ Embed into any website
- ✓ Extensible and flexible
- ✓ Integrate into any Swagger/Open API
- ✓ Submit to anything

# Time to value.

**Scale in price, performance  
and complexity.**

**MORF**

- ✓ Start small
- ✓ Low barrier to entry
- ✓ Automated conversion
- ✓ Enterprise ready

# Reimagine documents.

**Turning documents into services.**

*Adobe Document Services* is a set of web services that can be called upon to automate the conversion, creation, and management of documents.

# Overcome the scale of digital transformation.

What if you have  
**thousands** of forms or  
documents to convert?

## Welcome to machine generation.

Easily ingest 1000's of existing forms or documents in any format to produce flexible, embeddable and configurable web forms using an open standard.

Morf quickly and easily solves the biggest hurdles in achieving digital maturity.

A stylized graphic of two mountain peaks is located in the bottom right corner of the green box. The mountains are represented by simple geometric shapes with wavy lines for the slopes.

Thank You.

# Bring **value** to partnerships.

## Supporting our partners.

Morf provides robust data capture ability that can easily be embedded or integrated into web experiences, acting as a lever to drive adoption of our partner products and solutions.

# Partner strategy.

## Integrated solutions

Morf relies on integrations to deliver end-to-end solutions for customers. Aligning the Morf value proposition to our partner's solutions will drive adoption for respective products.

## Partner enablement

Marketing and sales work in an integrated fashion to deliver enablement sessions to major partners, and drive opportunities.

## Cross-promotion

Seeking out cross-promotion opportunities for partner marketing, case studies, success stories etc.
