

BlueVoyant's Managed Detection and Response (MDR) for Microsoft 365 Defender service **combines the power of Microsoft's Defender product suite with an elite 24x7 security operations team to identify, investigate and eradicate today's most sophisticated and advanced cyberattacks.**

## ABOUT BlueVoyant

BlueVoyant's Managed Detection and Response (MDR) for Microsoft 365 Defender service integrates proven frontline expertise and comprehensive threat data analytics with Microsoft 365 Defender to provide real-time and customized threat response and remediation.

## WHAT WE OFFER

**Unparalleled optics:** built on the industry's deepest threat insights and shared signals across domains enables synchronized defense and faster response.

**Automated security:** out of the box automation enables security teams to go from alert to remediation in minutes—at scale.

We integrate client-driven rules of engagement with built-in case management, automation and orchestration, and hands-on remediation to deliver immediate and decisive action that stop threats before they cripple your network.

The BlueVoyant threat hunting team identifies and defends against malicious campaigns as they emerge from the Deep and Dark web, hostile nation-states, and other threat actors. Our Security Operations Center incorporates all findings into Microsoft 365 Defender policies to detect and respond to the new and unknown attacks.

Microsoft 365 Defender is a complete security solution powered by the intelligent cloud that protects the Microsoft ecosystem from cyber threats, detects advanced attacks and data breaches, automates security incidents, and improves security posture.

## WHAT OUR CUSTOMERS ARE SAYING

*"We were looking for best-in-class managed Endpoint Security and Threat/Compromise Detection and Response capabilities and found them in BlueVoyant. We see their services as remarkably robust and industry leading, and it made sense for DarkOwl to go with the best in the business."*

— Mark Turnage, CEO, DarkOwl
