Security is non-negotiable.
Meet the highest governmental standards for security and compliance as you provide employees with access to Windows 365 on any device.

What is Windows 365 Government?
A cloud service that creates Windows 365 Cloud PCs that give your employees access to their apps, settings, and data from any desktop or laptop PC (Windows and Mac), phone, or tablet. Windows 365 Government is compliant with requirements of the United States Defense, Federal, State, Local, and Tribal agencies. And Microsoft offers the most comprehensive set of certifications and attestations of any cloud service provider. As a result, your agency can readily adhere to pertinent national, regional, and industry standards regarding controlled data.

Windows 365 Government is available in the US only.

Deploy Cloud PCs without compromising security.

Data security
Mitigate risk and leaks by centralizing data and access in the cloud.

Zero Trust
Protect, detect, and respond to threats more quickly through adaptive controls and continuous verification.

Capability restrictions
Leverage integration with Microsoft Endpoint Manager, which provides policy controls to help protect sensitive environments.

Compliance
Reduce the threat of a ransomware attack even as you equip a remote or hybrid workforce.
