Temporary workers are here to stay.
Modernize your workforce and boost their productivity with Windows 365.

Why Windows 365 Government?
- Windows 365 Cloud PCs provide a personalized Windows experience on any device, with apps, data, and settings retained.
- Accessible on any device — desktop, laptop, tablet, or phone — running Windows, iOS, or Android.
- Centralized data security that delivers a reduced threat surface and supports US Defense, Federal, State, Local, and Tribal government requirements.
- Cloud service that is easy to deploy and manage.
- Support for CJIS and IRS 1075 standards, DFARS, and DISA Level 2 Security Requirements Guidelines.

Windows 365 Government is available in the US only.

Equipment for contractors, seasonal, and temporary workers

**Scenario:** As election day nears, remote poll workers need secure access to proprietary applications.

**Solution:** Use your existing infrastructure to quickly onboard seasonal or temporary employees, so they can get productive without delay or compromising security. Windows 365 Cloud PCs are easy to set up and enable employees to work securely from anywhere, on any device.

Keep your data secured

**Scenario:** As investment in public works grow, many agencies are hiring new contractors and need to make sure they comply with US government standards.

**Solution:** Windows 365 Government centralizes data security and aligns with Microsoft Zero Trust to deliver a reduced threat surface and support US Government GCC- and GCCH-specific requirements.

Staff for unexpected needs

**Scenario:** When natural disasters strike, emergency crews rush to the affected area and join up in new teams, generally using their own laptops and phones.

**Solution:** Windows 365 Cloud PCs can be deployed immediately and accessed from any locale on any device, even personal ones. Everything is available, secure, and up to date.
