ColdFusion to Azure Migrations

media3
secure ▪ managed ▪ cloud

Benefits

-- Adobe Premier CF Partner

-- Extensive CF Migration Experience

-- Customized migration strategy based on the criticality of your applications

-- Migration of your application and servers managed by our Cloud experts

-- Transparency for your key users

Microsoft
Tier-1 Cloud Solutions Provider

Move your workloads, applications, databases and solutions to the cloud as-is with as little change needed as possible.

As the Adobe ColdFusion Preferred Vendor for migrating critical workloads to Azure, Media3 offers compliance-centered application server solutions, managed services, and consulting for customers in industries such as Financial Services, Healthcare, eCommerce, as well as FinTech ISVs and the Public Sector.

A Seamless Approach to Cloud Migration

Preparing and moving workloads to the Cloud can be a daunting task that requires deep technical experience, along with knowledge of common obstacles associated with cloud migration and how to overcome these challenges.
We provide the insight needed throughout every phase of your cloud journey.

We help you plan, migrate and support your modernization journey.

Here is how we do it:

■ **Phase 1 Assessment**

      overall application and db review
      identify application dependencies
      existing infra assessment
      identify security requirements

■ **Phase 2 Strategy/Planning**

      identify optimal Azure architecture
      visualize infrastructure
      develop migration strategy
      TCO - Total Cost of Ownership

■ **Phase 3 Initial Data Migration**

      setup infrastrucure
      initial application, data and db migration
      initial testing of apps
      test any failover functionality

■ **Phase 4 Final Data Migration**

      final application, data and db migration (incremental)
      final Testing
      final Go-Live, dns change, etc

■ **Phase 5 Manage and Optimize**

      ongoing monitoring
      ongoing updates
      performance metrics
      metric driven infra changes
      ongoing cost management

We help enable greater agility and increased innovation at less risk by doing your cloud migration safely and securely.
