

# DEVOPS APPLICATION MODERNIZATION WITH GITHUB AND AZURE

Modernize your application and accelerate delivery.

Looking to improve speed and quality of new feature delivery? Feeling pressure to innovate and simultaneously maintain application stability and reliability? You can achieve these objectives **by modernizing application DevOps patterns and practices using GitHub, Azure and InCycle's proven approach and advanced DevOps Accelerators.**

InCycle's DevOps with GitHub solution provides **key components required for a successful application modernization implementation.** Every aspect is designed to accelerate adoption and streamline the modernization process. The packaged service provides the implementation of advanced DevOps patterns and practices using GitHub repositories, continuous integration and continuous delivery (CI/CD) with GitHub Actions as well as GitHub Packages to support artifact management. It also includes, a PoC implementation of Dev/Test environments on Azure.

## MODERNIZE WITH GITHUB SAVE MONTHS!

Introduce your team to the leading DevOps toolset and increase your development velocity today!

### INCREASE RELIABILITY

Automated the entire workflow. Eliminates error-prone manual tasks.

### ON-DEMAND DELIVERY

Improve delivery speed and quality by quickly and frequently deploying and validating your solution.

### IMPLEMENT KEY PRACTICES

Implements state-of-the-art DevOps practices and tools. Start the journey of into the adoption of a modern DevOps culture.

### TAKE ADVANTAGE OF AZURE

Implement on-demand "everything as code" environment provisioning. Simplify your maintenance and get benefits of key Azure technologies and services.

## PROJECT PHASES

### 1-STRATEGY

- Identify business drivers
- Introduction to GitHub and DevOps targeted practices
- Review application
- Define strategy and scope

### 2-IMPLEMENTATION

- Source code integration or migration
- CI/CD automation
- Environment provisioning automation

### 3-CONCLUSION

- Results presentation
- Knowledge transfer
- Next steps identification
- Support and mentoring

"InCycle helped us modernize our DevOps practices and quickly (weeks) adopt GitHub and Azure. This eliminated costly and error-prone manual tasks and provides us valuable time to innovate and bring new features to our customers — faster!"

*InCycle Fortune 500 Financial Customer*
