

SERVICE BRIEF

Microsoft Azure Data Governance and Protection

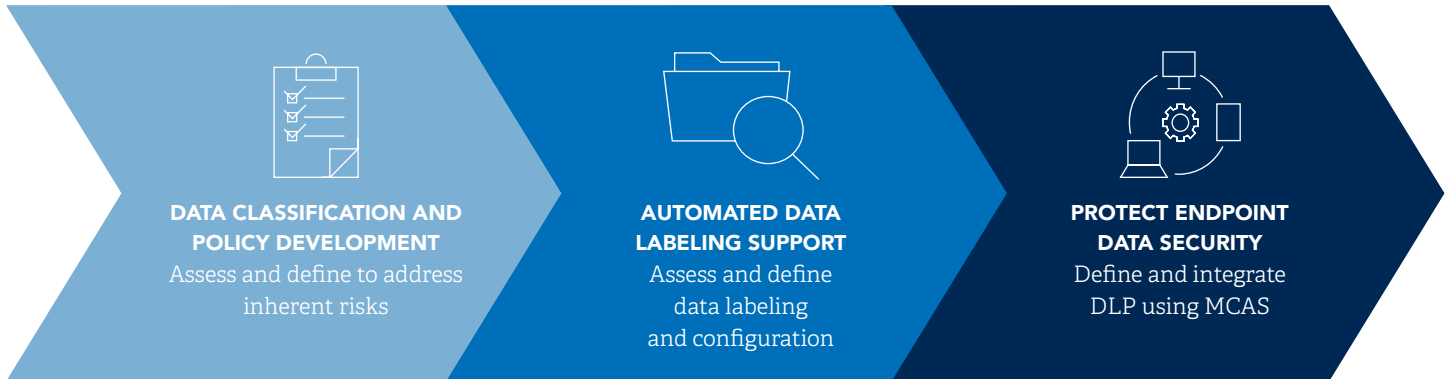

Optiv enables data governance and protection of your data within Microsoft Azure

As Microsoft expands upon its cloud strategy and more businesses migrate to the cloud, organizations are increasingly focused on securing their data assets within their Microsoft Azure environment - And for good reason. With over 180 million active monthly Office 365 business users¹, it's a primary target for hackers.

As an effective cloud strategy requires inclusion of data governance and protection, Optiv's experts can help securely optimize your data governance and protection program within your Azure environment to ensure visibility, compliance, quality, and control for data that lives on-premise and in the cloud.

How Do We Do It?

Optiv's Microsoft Azure Data Governance and Protection service offers analysis, configuration and enablement services to ensure full data visibility security across Azure applications and beyond as this data inevitability makes its way to other applications and environments.

Business-Aligned Outcomes

IMPROVED SECURITY SAFEGUARDS
Reduce risk through proper structured and unstructured data control

CONTROL AND SECURE ENDPOINTS
Secure sensitive data within email and other Microsoft Office applications

DATA LIFECYCLE PROTECTION
Secure data through automated labeling and set policies in support of the data lifecycle

UNLOCK AZURE OFFERINGS VALUE
Enable additional Microsoft features and capabilities without reducing data security
