

How to secure email and collaboration with Microsoft Defender for Office 365

Email remains the primary method of communication for most organizations... but securing it is a constantly evolving challenge.

Email is the top entry point for ransomware.

Over 90% of cyber attacks start with email. Defending email is critical to stopping threats throughout your entire organization.

The threat landscape continues to evolve

Advanced attacks like business email compromise are difficult to spot, requiring an intelligent solution that stays one step ahead.

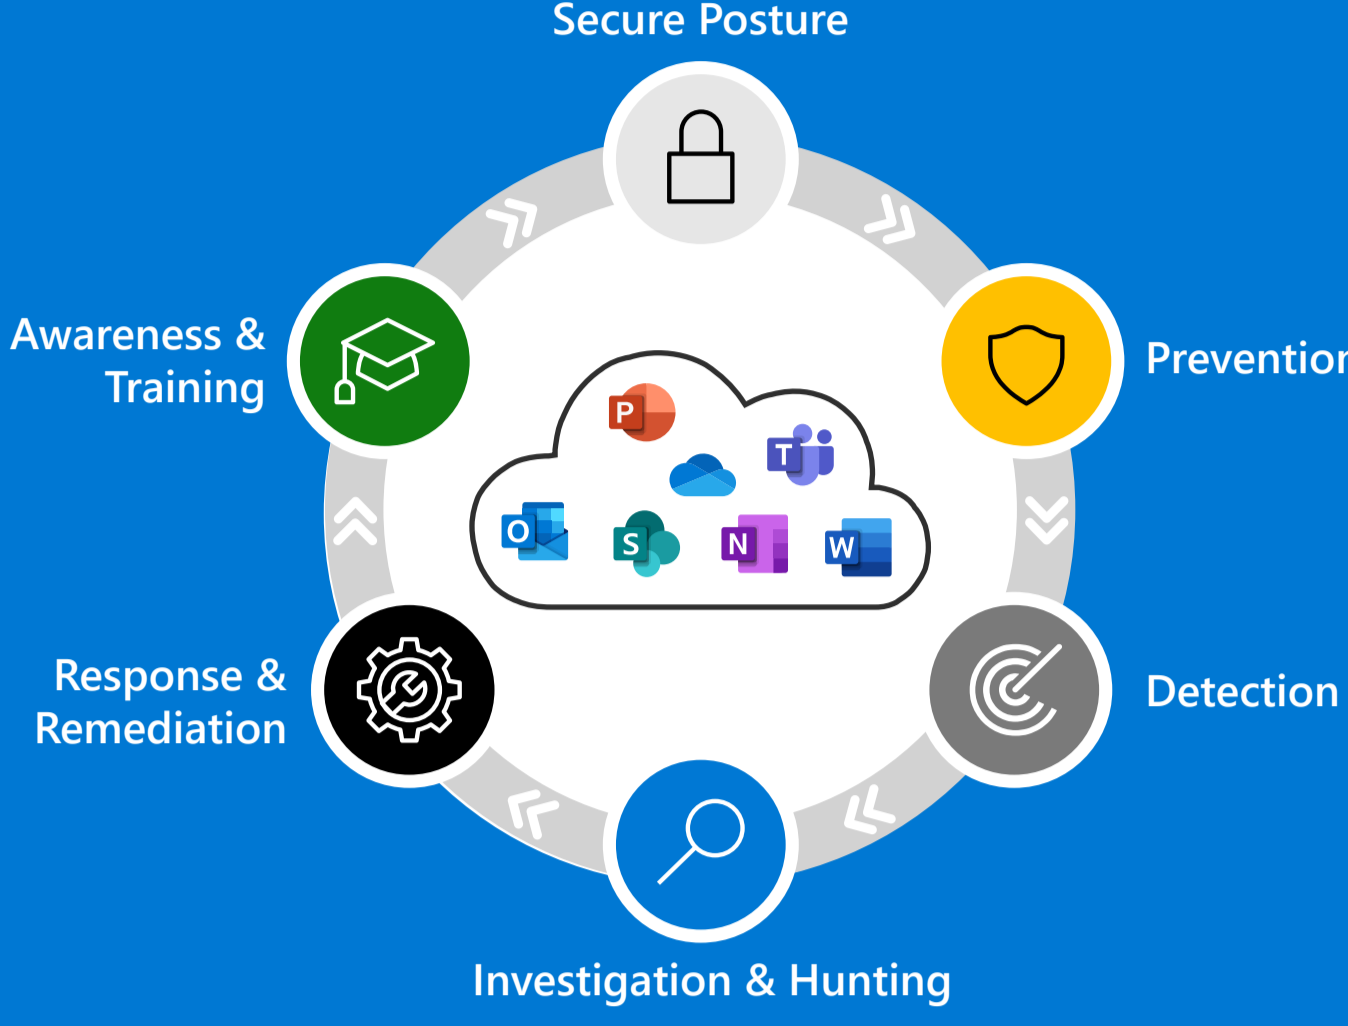

Collaboration tools are growing in popularity

Hybrid work has given rise to new methods of communication, all of which represent new threat vectors to defend.

Microsoft Defender for Office 365 provides a comprehensive solution that offers posture management, threat protection, response, and education.

Every Office 365 subscription comes with basic email security built-in, called Exchange Online Protection (EOP). But with Microsoft Defender for Office 365, you can extend that protection with advanced detection, investigation, and response.

Exchange Online Protection
Prevents broad volume-based and known attacks

Defender for Office 365 Plan 1
Protects email and collaboration from targeted malware, phishing, and business email compromise attacks.

Defender for Office 365 Plan 2
Post breach investigation, hunting and response. Includes automation, attack simulation training, and XDR integration.

With Microsoft Defender for Office 365, you get:

Deeply integrated protection

All the benefits of a leading security vendor deeply integrated with Office 365, so you can boost productivity, simplify administration, and lower cost of ownership.
