Cloud Readiness Briefing

Free meeting to help you determine your Cloud Migration Readiness

We will help you verify if you are well-prepared for migration

During the meeting, we will focus on the following issues:

1. What results do you expect from the migration and whether the cloud will meet them

2. What are your challenges and does the cloud have solutions to address them?

3. What does your team need to learn in order to perform the migration successfully?

4. What is the estimated cost of the services you need?

5. How Sii can help you with migration and what does the process look like on our part

Why our clients decide on our help

➢ They verify their expectations regarding the possibilities of the cloud

➢ They can better plan the migration process and prioritize actions

➢ They can estimate the cost of cloud services in advance

➢ They will gain additional knowledge and recommendations

The scope of our Azure services

- How to solve the current challenges of an organization using cloud
- Initial assessment of the company's readiness for adoption

Azure Cloud Assessment

- Audit of Azure Cloud implementatrion and management procedures
- Recommendations for increase Security, High Availability, Costs optimization and other best practices
- Initial Action Plan with task priorities

Cloud Ready environment

- Documentation of requirements for cloud governance and management
- Requirements for compliance with internal procedures and regulations
- High-level architecture and documentation

Azure IaC Implementation

- Preparation of environmental management methodology using IaC
- Implementation of tools and processes
- Support in migrating resources to code
- Trainings for engineers

Monitoring Azure

- Analysis of the monitoring environment and the expected results
- Implementation of Azure Monitor and other tools
- Trainings for business owners and technical engineers

Migration to the Cloud

- Assessment of servers, virtual machines and network environment
- Choice of resource migration methods and work schedule
- Resource migration, cost optimization, management solutions

Technologies

We use various technologies to meet your needs

Azure

Azure DevOps

GitHub

Terraform

dynatrace

Tangible Benefits / Desired Outcomes

- ✓ You take care of your business development - we take care of the cloud
- ✓ Our architects will support you in the latest technologies
- ✓ We are ready to maintain your infrastructure with dedicated support team
