## Embracing the transforming Health Care landscape

Power BI for the Health Care industry brings data-driven culture to the forefront and provides clinical agility, empowering health team collaboration.

Using Power BI in the Health Care industry **minimizes costs, maximizes revenue, enhances patient care, improves patient satisfaction**, all by abiding with the compliance regulations. Power BI can predict the requirement of new resources, specialists, machinery, medicines, and much more.

Solutions

# How Power BI can help

Empower  
Health Care  
workers

Offer  
personalized  
care

Provide data  
security and  
compliance

Drive foresight  
with actionable  
insights

# Empower Health Care workers

Today's Health Care industry is rapidly changing demands and calls for a quicker triage process. Healthcare is evolving and adapting to disruptive changes exponentially, especially in unforeseen pandemics or calamities.

Power BI allows visualization and analysis of data and keeps track of patients testing demands. It helps the Health Care workers to understand and optimize the resource needs

Enhancing self-service reporting for data-driven decision making

**"Power BI was more powerful on light ETL functionality and its usability than other tools, which helped win it over in the company."**

Morten Hannibalsen Olsen,  
Application Consultant  
Grundfos

**GRUNDFOS** 

# Offer personalized care

The Health Care industry is striving to achieve patient satisfaction by providing ultimate patient care. Power BI is a solution providing them a chance to offer personalized care.

Instilling a data-first mindset to uncover key information for critical business solutions

“[With] Power BI, no longer is it just that centralized IT or business intelligence team that’s able to go in and produce some powerful insights, but now that’s being democratized and users at all skill levels are able to go in and build out Power BI content to help grow and drive your analytics culture and drive your business.”

Chris Wagner, Enterprise Architect  
Rockwell Automation

# Provide data security and compliance

Leverage a complete view of operations in Power BI to drive greater production efficiency. Visualize products at every stage with AI capabilities in Azure to identify customer trends and optimize forecasts for reduced overstock.

Driving data insights  
across all levels of  
the organization

**“Power BI has proven itself as being a very powerful tool. It’s easier for top managers to use the reports and has helped our company to become more data-driven.”**

Mathias Johansson, CIO  
Sandvik Coromant

# Drive foresight with actionable insights

The goal of the Health Care system is to diagnose the precise reason behind a specific ailment, cure it and restore patient health. Power BI harnesses data to offer clinical and operational insights that help patients get diagnosed, treated, and cured.

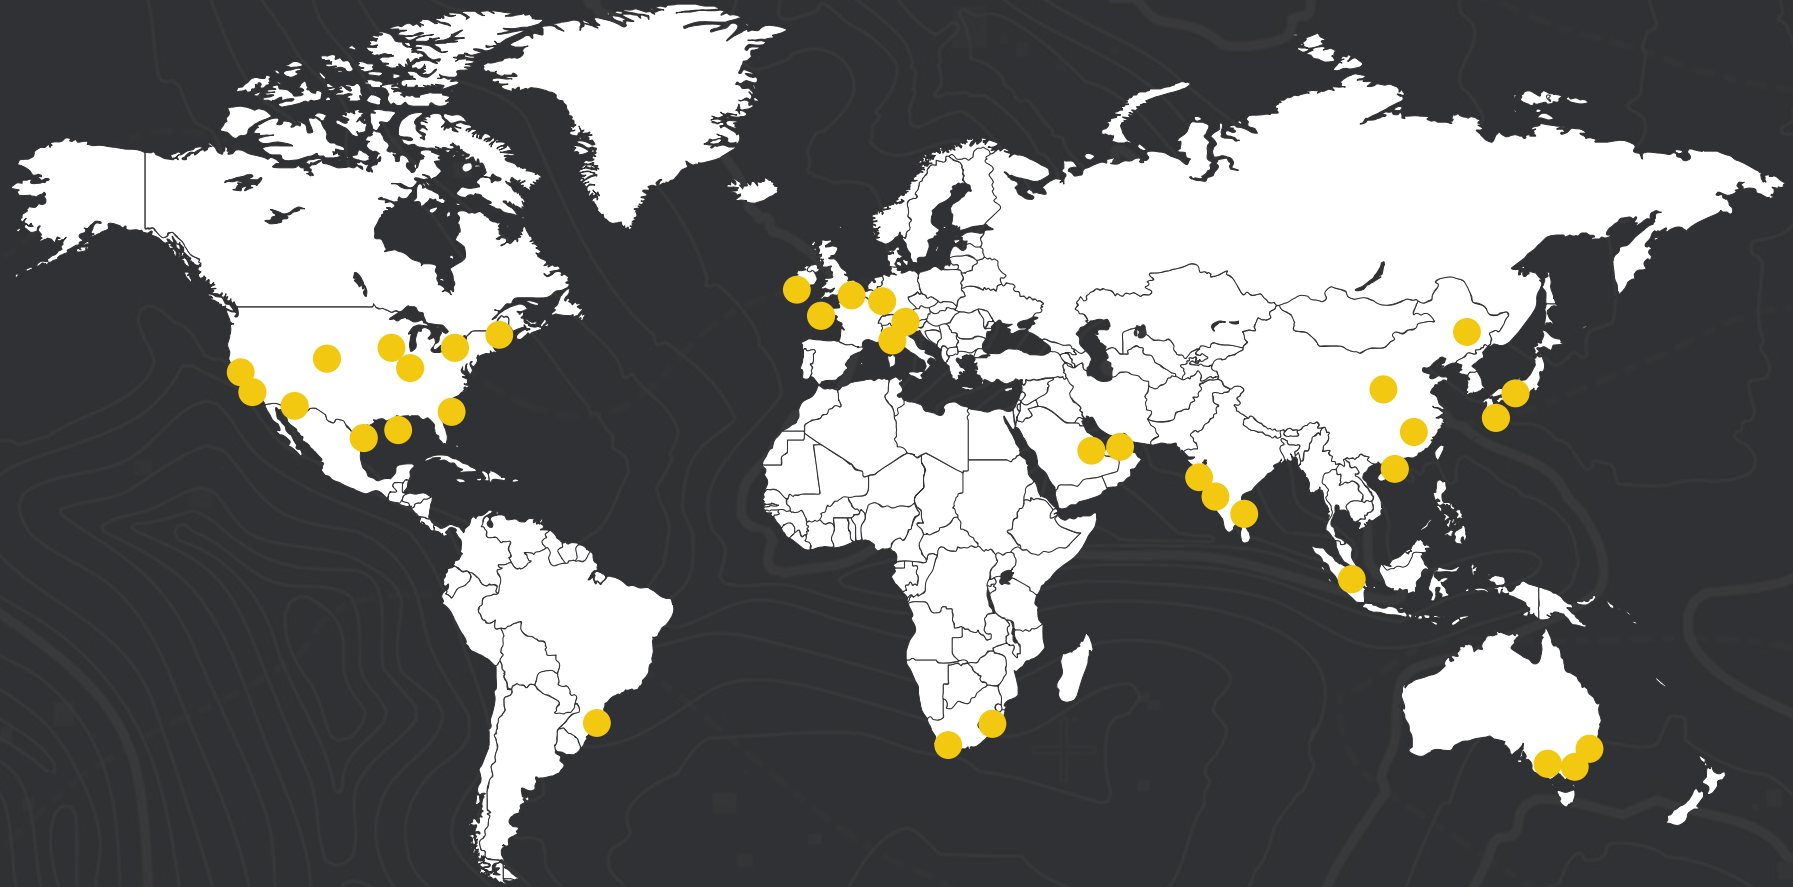

Improving business intelligence through Power BI Pro insights

**“We’ve now put Power BI across the organization... We have Power BI solutions with an analyst in Australia and the chief exec[utive] all using the same report all the way through with row level security. We’ve got digital dashboards on our executives’ walls with Surface Hubs.”**

Tim Depledge,  
BI Transformation Manager  
BP

# Secure

Better protect Power BI data with Microsoft Information Protection and Microsoft Cloud App Security, one of the most trusted choices in the world.

**44** Languages

**40** Primary and backup datacenters worldwide

**National Clouds** US Government, China & Germany
