Insight

It is becoming increasingly evident to enterprises that building cloud-native solutions makes it easier to quickly build and deliver new digital experiences. For them to embark on this journey of digital transformation, the building blocks for digital transformation are essential. This adds to the development costs as well as the time it takes to complete the project.

As a solution to the above needs, we developed a cloud-agnostic platform using cutting-edge technologies that can accelerate the customer's digital transformation journey. With the suite of services, customers can fast-track the delivery of cloud-native solutions, innovate more easily, and scale more effectively. With algorithms powered by machine learning and artificial intelligence, customers can gain actionable insights from their data, and create custom dashboards quickly. With these accelerators, time to market is reduced by 30%-40% since the development effort is drastically reduced.

Features:

1. Centralized and configurable notification services
2. Domain agnostic industrial asset hierarchy management
3. Hassle free, cloud agnostic user management with RBAC
4. Perfect visualization via interactive dashboards
5. Connectors for different IoT systems
6. Supports hybrid cloud
7. Customized solutions based on customer needs

Benefits

1. Suite of Cloud Agnostic services that eases the digital transformation journey
2. Reduce time to market by 30 - 40%
3. Bring in actionable insights to data
4. Innovate more easily and scale efficiently
5. No vendor locking

Features

Domain agnostic Industrial Asset/Fleet Hierarchy Management

Perfect visualization via interactive dashboards

Centralized and configurable notification services

Hassle free, cloud agnostic user management

Connectors for different IoT systems

Supports hybrid cloud

Customized solutions based on customer needs
