

# **SECURING AZURE AND AZURE AD: 1-HR OVERVIEW**

Well  
Architected  
Framework

# SECURING AZURE AND AZURE AD - OVERVIEW

How can you ensure that your cloud environment is setup aligned to best practice?

Bring in the experts at BJSS to advise and answer your questions.

## BJSS offers a free 1-Hr overview to:

- Present examples of secure practices gathered from BJSS's vast experience across many industries and clients
- Discuss the emerging threat landscape
- Delve into zero-trust principles.
- Understand how automation can provide assurance.
- Showcase opportunities for shift-left in your organisation.
- Understand your business challenges.

### A PROVEN APPROACH

1

We follow the latest best practice recommendations from Microsoft, and share our proven experience of implementation across multiple industries

### UNDERSTAND YOUR BUSINESS

2

We will work together to understand and prioritise your business objectives and most pressing security requirements

### IDENTIFY THE PRIORITY AREAS OF FOCUS

3

We will advise you as to how best to approach the remediation of issues, so as to ensure minimal business impact

# SECURING AZURE AND AZURE AD – FOCUS AREAS

- **Securing Azure:** Use of Azure roles and how to best to implement and automate
- **Securing Azure AD:** Use of Azure AD roles, Identity Protection and other licensed features
- **Azure Policy:** How to effectively implement Azure Policy and Initiatives for control and visibility through automation
- **Azure Monitor:** How to implement observability services into Azure and Microsoft services, and how to surface and secure reporting and alerting
- **Privileged Identity Management:** How to implement services across your Azure estate to provide audited, limited blast radius access
