

Healthcare providers have never had a connected system to provide a continuum of care from the clinic to the home. Until now...Introducing the Felix platform!

Feelix
by Sonavi Labs

**FDA
CLEARED**

Respiratory Assessment and Monitoring Platform

- Support clinical decision making with real-time with personalized data
- Evaluate treatment efficacy remotely. Keep patients home without losing touch

DONE

Get these great benefits with Feelix:

- Extend the reach of your clinical workforce
- Store high-fidelity data during an in-person clinical visit and when patients are at home
- Maintain the integrity of in-person visits
- Track trends and use objective, real-world data to personalize, implement and modify treatment plans remotely

Having Feelix in the home with chronic disease patients is like having a clinician on hand 24/7

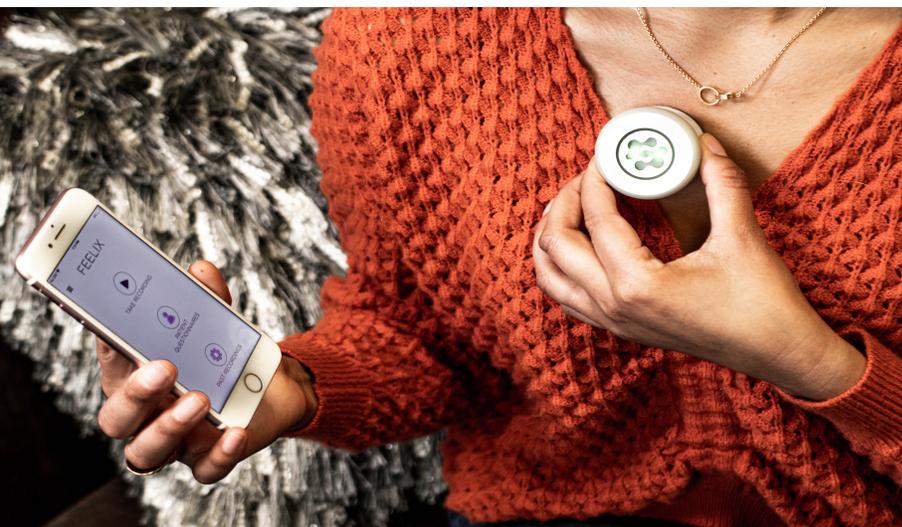

The Feelix system uses advanced acoustics and Bluetooth connectivity to capture and share clinical grade body sounds from home, allowing care teams to monitor trends remotely

Feelix is eligible for reimbursement using existing CPT codes including 99453, 99454, 99457, 99458, 99091

Feelix will soon be eligible for reimbursement using newly released codes 98975, 98976, 98980, 98981

- Connect with patients where they are most comfortable, *IN THEIR HOMES*
- Enhance hospital-at-home services with high-fidelity auscultations
- Build a lucrative, remote monitoring plan that delivers improved patient outcomes
- Give patients the ability to have meaningful engagement with care teams at anytime
