Virtual Data Center
A Cloud Accelerator Pack from Innofactor

The express route to achieve extraordinary and lasting Azure consumption. Transform you IT operations people into change agents. Virtual Data Center is code deployed in your Azure platform, turning it into a manageable, safe and cost-efficient data center.

What is VDC?
Innofactor Virtual Data Center is code deployed in customer's Azure platforms, turning them into manageable, safe and cost-efficient data centers.

Why customers use Innofactor VDC

"The consultants at Innofactor AS are highly skilled, capable and easy to work with. In addition, they are very dynamic and flexible, if there are any last-minute changes from our side. Therefore, I would be pleased to serve as their reference," Lars Løvf, Walenenius Wilhelmsen

Rapid implementation

Time-to-consumption reduced by 80%
- 5-6 times faster than building from scratch. You're up and running in a few weeks.
- 20% consulting spend compared to building from scratch.
- VDC puts you in control with a complete set of dashboard and cost control

No more dwelling in technical details in the firewall, storage, servers and virtualization

Secure datacenter

Customers will not churn
- Follows best practice from a lot of similar deployments and Microsoft Cloud Adaption Framework recommendations

Ops people are truly participating in the Agile Release Train.

Effective governance

Delivered with IT operations staff
- Staff is trained so they are comfortable with the transition
- Security is delivered in a set and battle proven package and it's continuously updated
- Infrastructure as Code is a simple task with VDC. It's all delivered in a package

All resources can be directed towards building real business value.

"The time to market is becoming critical as the time span is shifting from months and years to weeks and months," Roopesh Das , SVP of Digital and IT, Wallenius Wilhelmsen

"Growth and new technology require stronger IT. Without a good Governance structure, we would not have been able to move business-critical applications and data to the cloud. This was made possible by Innofactor's consultants who have a great understanding of technical side but also how IT can leverage the business." Finn Aksel Falkenberg, Director of Service Delivery, Orkla ASA
