About Victa

About Victa (who are we ?)

Victa is a dedicated business intelligence company. With over 12 years of experience, Victa has delivered innovative business intelligence solutions to more than 800 companies of all sizes, across all industries and geographies.

Our goal is to help organizations become data-driven by visualizing and managing data in a way that easily fosters insights and drives key business decisions.

Our products are focused on Data Visual Analytics (Qlik® and Microsoft Power BI) , Data Management (TimeXtender, Azure Synapse, Snowflake) Data Storage (Azure SQL/DataLake), Data Connectivity (Pipeline Management), Data Cloud Services (Azure Infra-structure) and Data Science (Python, Tangent).

Our services consists of Consultancy Services , Educational Services, Support Services (ITSM) and Development Services. We want to offer a one-stop-shop experience for companies with all their data challenges.

We operate from 2 offices in the Netherlands (Hengelo and Amsterdam) with a great team of 50+ data professionals who are eager to create distinctiveness by delivering excellent quality through efficient Projects, effective Training and amazing Design (UI/UX) supported by the best products and innovations available in the market.

Mission , Vision & Goals

Mission (what is our identity)

We support companies of all sizes, across all industries and geographies with their information needs with an innovative portfolio of Business Intelligence (BI) products and services.

We have a customer centric approach, and we shall understand their data needs better than anyone else. Our dedication to making every customer a reference is our most important guarantee for long-term value growth in our company.

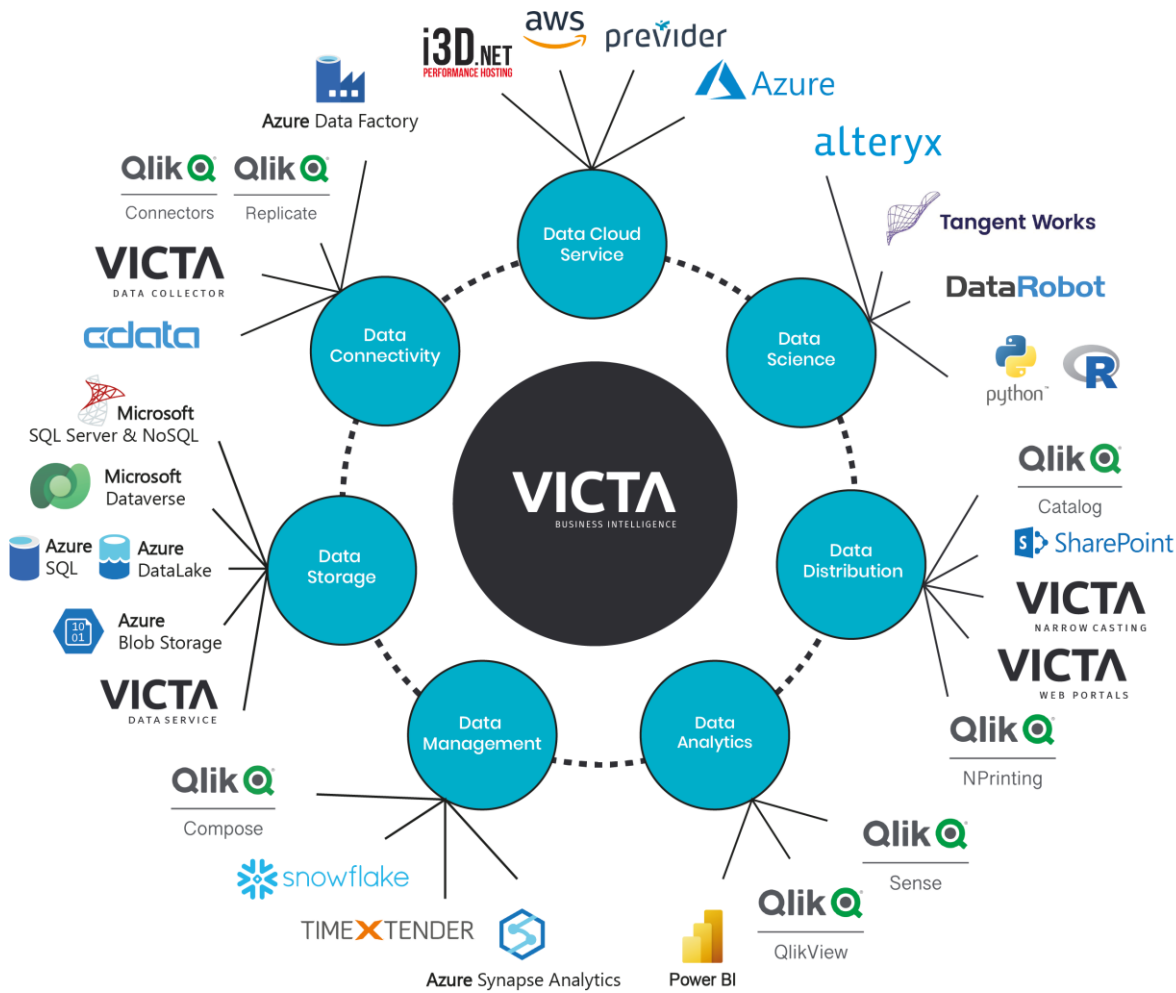

Our expert employees, who continue to distinguish themselves through their expertise, focus, pro-activity and job satisfaction, are the key to generating outstanding performance over the long term and achieve planned business goals.

Vision (what do we want to achieve)

We give our customers business insights through the effective use of data. As a business intelligence partner to all companies, we help to manage data and visualize information in order to generate knowledge and deep insight, with the ultimate goal to make better data driven business decisions.

Strategic products & services
