### What is DevOps?

"DevOps is the union of people, process, and products to enable continuous delivery of value to end users."

Donovan Brown, <u>What is</u>
 <u>DevOps?</u>

### What can Azure DevOps do?

Azure Boards: Agile planning, work item tracking, visualization and reporting tool

**Azure Pipelines**: A language, platform and cloud agnostic CI/CD platform with support for containers or Kubernetes

Azure Repos: Provides cloud-hosted private git repos

**Azure Artifacts**: Provides integrated package management with support for Maven, npm, Python and NuGet package feeds from public or private sources

Azure Test Plans: Provides an integrated planned and exploratory testing solution

## Lab: Agile planning and portfolio management with Azure Boards

Lab overview:

In this lab you will learn about the agile planning and portfolio management tools and processes provided by Azure Boards and how they can help you quickly plan, manage, and track work across your entire team.

#### **Objectives:**

Manage teams, areas, and iterations Manage work items Manage sprints and capacity Customize Kanban boards Define dashboards Customize team process
