

CDI Software Asset Consulting and Management Services

Software Asset Tactical Analysis

A “CDI SAM Central” Offering

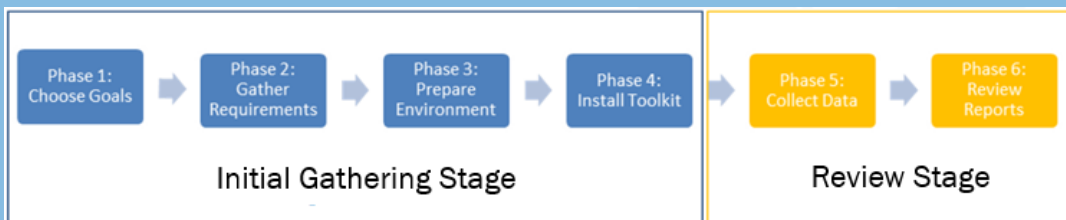

Are you fully prepared for your next OEM Licensing audit?

CDI’s Software Asset Tactical Analysis “SATA”, a Branch of CDI’s SAM (Software Asset Management) Central consulting services is used to provide visibility into your current asset utilization to allow for OEM audit risk mitigation.

SATA leverages a combination of unparalleled software licensing expertise, proven repeatable process and best-of-breed tools. This allows CDI to quickly and accurately assess the current state and make practical recommendations.

Activities Include:

- Goal Setting to align with business needs
- Tool-Based asset analysis in real-time
- Expert analysis of all captured data
- Dashboard review of results
- Compare to existing purchases to validate compliance
- Validate asset compliance and ROI for potential savings
