

Sustainability and ESG

Eka’s sustainability and ESG solution provides turnkey visualizations for GRI, SDG and CDP standards amongst others.

Challenge

Corporate sustainability is subject to a lot of attention but not a lot clarity. Multiple reporting standards and inconsistent ways of collecting and processing critical sustainability information results in the inefficient duplication of data collection efforts and limits organizations’ ability to gather real-time, actionable insights.

Solution

Eka’s sustainability and ESG solution uses preconfigured analytics to make sustainability performance efficient, precise and timely. We empower enterprises to implement industry best-practices to collect the insight required to deepen supply chain collaboration, mitigate sustainability risks, and monitor the strategic use of energy and resources.

Eka’s sustainability and ESG solution provides turnkey visualizations for GRI, SDG and CDP standards amongst others. It allows you to address regulatory, corporate reputation, worker well-being, and process standardization without the prohibitive cost and specialized expertise required to implement more complex reporting solutions.

Intelligence engine

- Helps enterprises with goal setting and measuring progress towards them
- Quantify, reduce and label based on current standards
- Calculate Tracking and managing compliances
- Provide integrated understanding of company risks
- Ensure safe operations to protect employee health and performance
- Enables environmental sustainability performance
- Manage regulations and stay compliant
- Achieving buy-in and recognition from stakeholders

Technical specification

Data sources

- Proprietary Eka template
- Connectors for major ERP systems such as SAP, Oracle etc.
- Third party data sources such as TR

Frequency

- Frequency
- Real time/ Daily

Complexity

- Medium to Low

Key insights

The Eka Sustainability and ESG Solution has three focus areas: environmental sustainability, Social and Corporate Sustainability and Employee health and safety.

- The environmental sustainability includes processes to reduce greenhouse gas emissions and prevent environmental damage and other environmental compliances.
- Social and Corporate Sustainability includes processes and compliances related to regulations, labelling and corporate social responsibilities
- The employee health and safety covers systems to protect workers, customers and surrounding communities from exposure to pathogens, radiation or hazardous chemicals and procedures to keep workers safe from physical injury due to machinery or exposure to hazardous substances on the job.

Key features

Compliance

Comply with corporate reporting requirements as well as the GRI, UN SDG, CGP and any other standards, and report them accurately

Actionable insights

Drive initiatives including training programs, incident captures, and legal proceedings or take course correction measures when certain metrics are breached.

Self service

Freedom to create custom dashboards based on the individual or corporate

Alerts and notifications

Set alerts for breach of set standards or KPIs at real time, to reactive and proactive action enablement.

Auditor login

A dedicated auditor login, (with or) without editing rights can ensure fast and cost-effective auditing of your sustainability data and programs.

Aggregated information

Aggregate disparate data for a comprehensive view across Corporate & Social Sustainability, Environmental Sustainability & Employee Health & Safety – data ranging from data on human rights initiatives including parental leave, equal compensation, child labor incidents, and harassment, to greenhouse emissions, waste management, marketing, and labelling.

Eka Cloud Platform

Digitally connect and collaborate across your entire business network with one common experience, one security model and one integrated source of data. Eka's Cloud Platform automates processes, enhances insights and secures trusted data.
