

BRANDED PORTALS

Create *custom portals* to easily share your best content

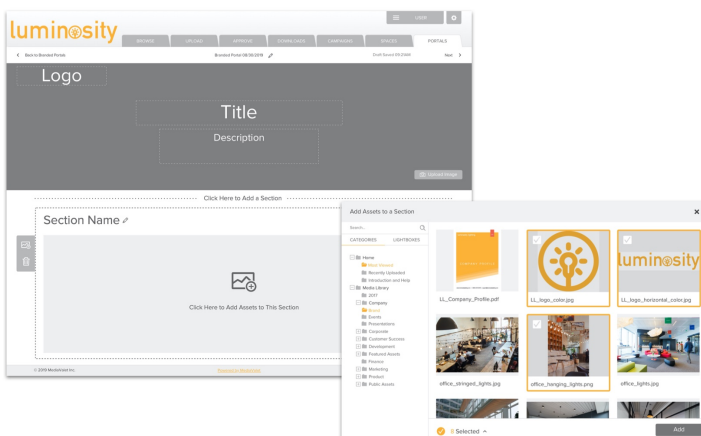

Create microsites for
channels, partners,
distributors and vendors

Publicly share or protect
your portals with
passwords

Curate and share assets
instantly for product launches,
campaigns and more

Distribute assets while staying on brand

- Build custom branded portals in minutes, with an easy-to-use page builder
- Maintain your brand identity with customizable logo and color selection capabilities
- Create and organize portal sections by asset type, campaign or project

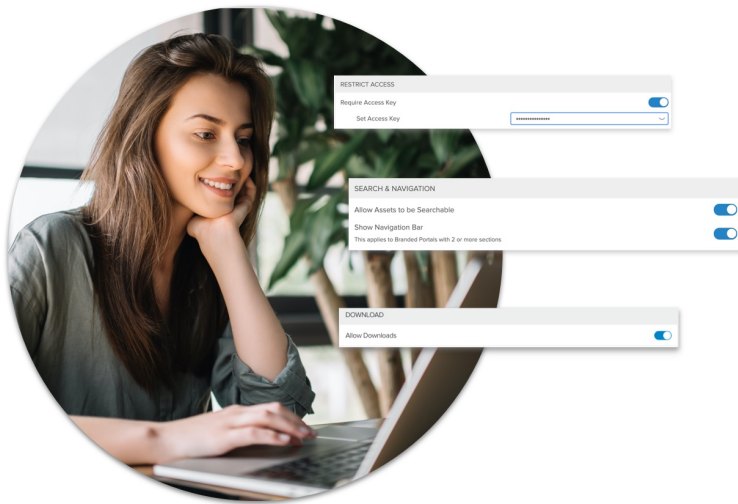

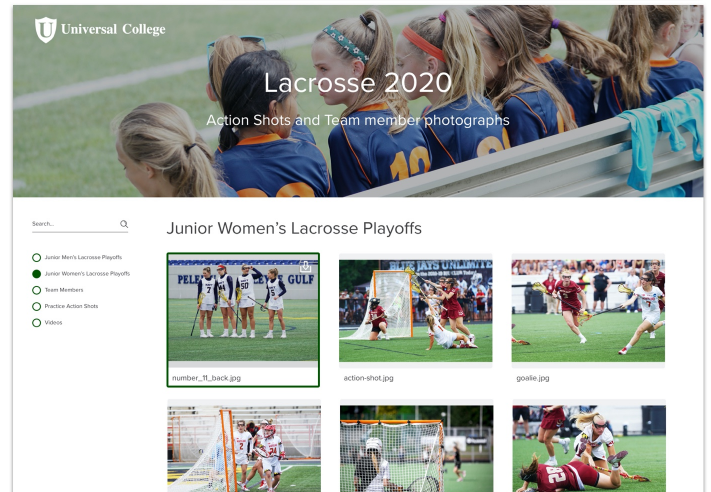

Customizable URL

<https://universalcollege.mediavalet.com/YourCustomPortalName>

Share collections at scale

- Share collections of assets (images, videos, documents) with internal or external users via a customizable URL
- Ensure your assets can be accessed from any device, with mobile-friendly portals
- Share into your existing channels without worrying about file size limitations

Manage portal access and distribution

- Enable password protection and to control asset availability
- Configure asset download and sharing settings based on user permissions
- Ensure up-to-date and approved assets are always used, with two-way synchronization between the DAM and Branded Portals

PORTALS FOR EVERY USE CASE
