

SOLUTION OVERVIEW

AIRIA is a self-learning Spatial Analytics platform used by Safety, Facilities and IT teams to optimize resources, maximize capabilities and improve safety response and planning. Our AI-powered platform is an intuitive software solution that anonymously analyzes and visualizes the distribution of people, and associated trends, throughout customer environments. AIRIA features: population heatmaps, AI-driven “Smart Alerts,” reporting capabilities and playback functionality.

APPLY INTELLIGENCE TO YOUR INFRASTRUCTURE

AIRIA is easy-to-deploy and easy-to-use software. It enhances previous investments into network infrastructure and integrates with existing data sources (WiFi & BLE). No hardware or sensors necessary!

SELF-LEARNING

AIRIA learns, understands and predicts how people & devices move throughout customer environments, continuously ingests & learns from new data.

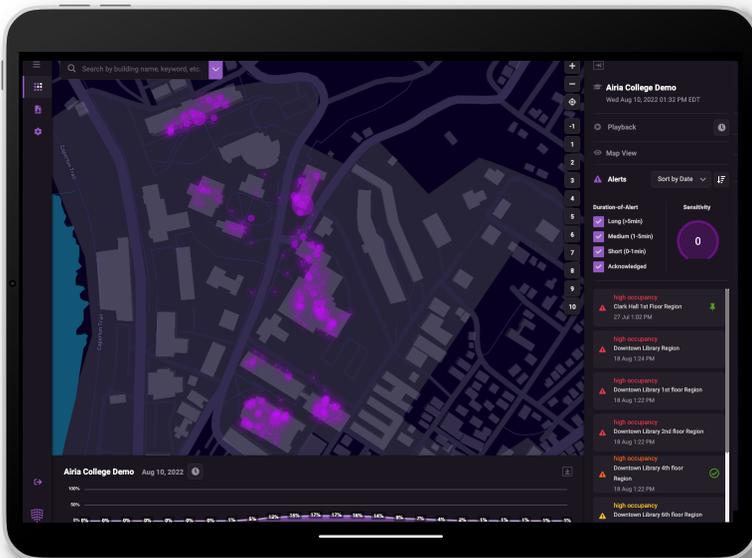

DATA-AS-EVIDENCE

Throughout AIRIA, visualizations are paired with data, charts and graphs to provide decisionmakers information in a familiar format

INVESTMENT ENHANCEMENT

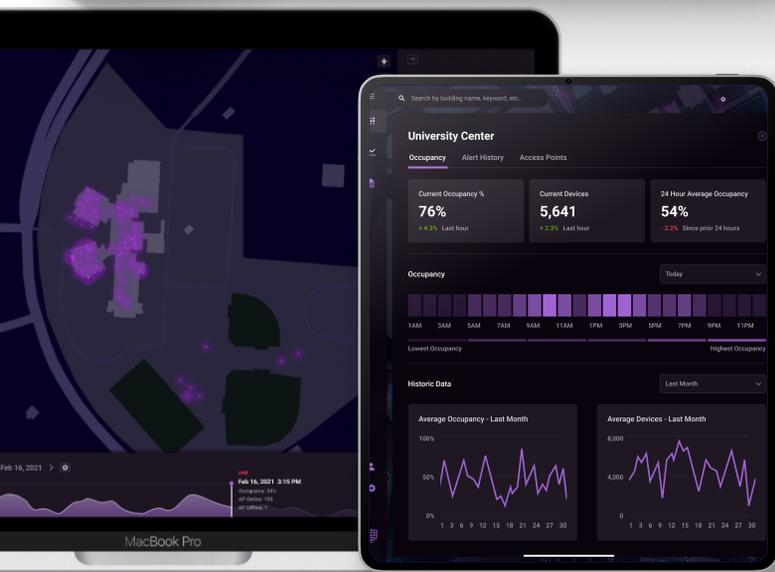

AIRIA helps teams extract additional value from prior investments into networking and security tech

RESOURCE OPTIMIZATION

AIRIA supports dynamic decision making by leveraging visualizations and data-driven, actionable insights. The playback features and predictive analytics provide decision makers with the information they need to execute with confidence.

- ⦿ OCCUPANCY TRENDS
- ⦿ CONTINUOUS AUTOMATION & ANALYSIS
- ⦿ SPENDING OPTIMIZATION
- ⦿ INBUILT EXECUTIVE REPORTING
- ⦿ SUPPLEMENT HUMAN INSIGHT WITH RELIABLE DATA
- ⦿ AUDIT CAPABILITY

SECURITY PLANNING & RESPONSE

AIRIA helps teams create security policies and procedures by using dynamic insights, connecting past events with real time security operations. Operators can view their environment to see exactly where people are within their facilities, gaining comprehensive situational awareness.

- ⦿ BIRDS-EYE-VIEW HEATMAP
- ⦿ INTEL IN THE MOMENT OF NEED
- ⦿ CROSS-TEAM COLLABORATION
- ⦿ COMPLIMENTS CCTV & ACCESS CONTROL
- ⦿ NARROWS TRAINING SKILLS GAP
- ⦿ ALERTS WITH PRORITIZATION & RANK OF IMPORTANCE

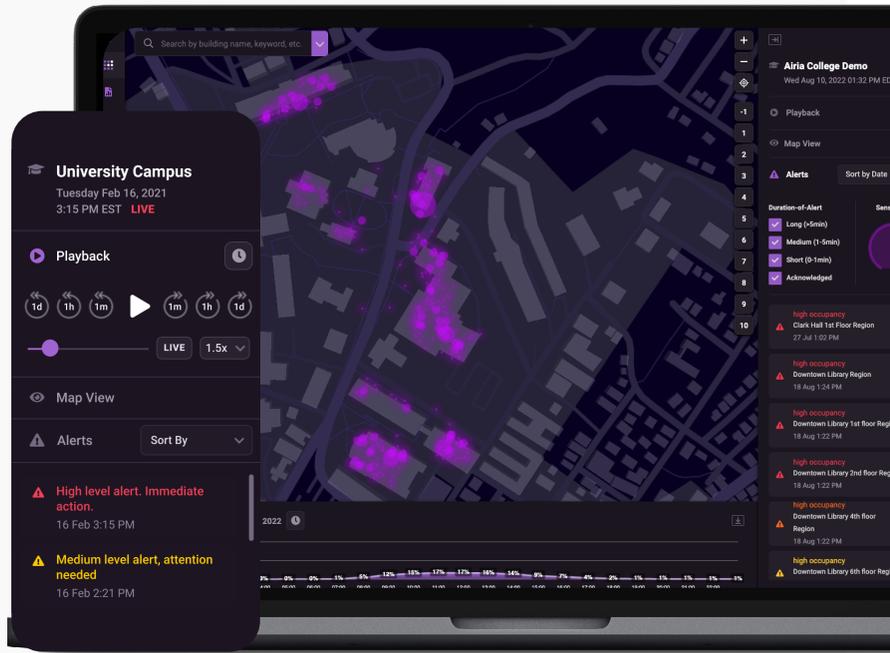

EXISTING TECH LANDSCAPE

Presently, institutions are reliant on solutions that are often:

- Expensive to maintain
- Lacking interoperability
- Hardware-centric
- Designed for experts

These solutions often also lack

- AI-driven interpretation
- An intuitive User Interface

INTUITIVE USER INTERFACE

AIRIA's interface was strategically designed for users of all skill levels. AIRIA natively displays data in real time and also has the ability to "playback" and "fast forward".

INTEGRATIONS + INTEROPERABILITY

AIRIA is a platform that easily integrates with existing systems and operational workflows, requires minimal upkeep and enhances the value of existing infrastructure investments.

QUICK TO DEPLOY

AIRIA is easily deployed with minimal resource requirements upfront and overtime. The platform is ready to be used by operators of all levels from the moment it is deployed.

SMART ALERTS + ACTIONABLE INFORMATION

AIRIA is designed to separate "signal" from "noise." AIRIA provides clear and simple alerts about issues occurring in real time. The automated analytics uncover trends taking place over extended periods of time, normally invisible to the human eye.

DATA PRIVACY

AIRIA takes data privacy very seriously. Our product analyzes trends and does not identify individual people. The platform offers the ability to delegate privileges (which administrators determine) and no Personally Identifiable Information (PII) is collected or displayed.

REAL-TIME GEOSPATIAL INSIGHTS

AIRIA uses geospatial mapping technology to generate real time visualizations of movements around customer environments.

AIRIA Team

The AIRIA team has been researching the Spatial Analytics market for nearly a decade. We come from backgrounds in AI enterprise software, Solution Architecture, Cyber Security and IT/Network infrastructure. Our team is supported by a wide array of technical partners throughout the United States and Europe, including advisors with domain expertise spanning Government Security, Legal, AI and Academia.

COMPANY QUICK FACTS

- FAR Compliant
- GSA Listing (pending final review)
- Carahsoft Vendor & Partner
- All team members reside within North American
- SAM.gov and new UEI number registered
- Eligible for small business set aside & mentor-protoge opportunities
