

# Microsoft Power Platform Center of Excellence (CoE) by Cyclotron

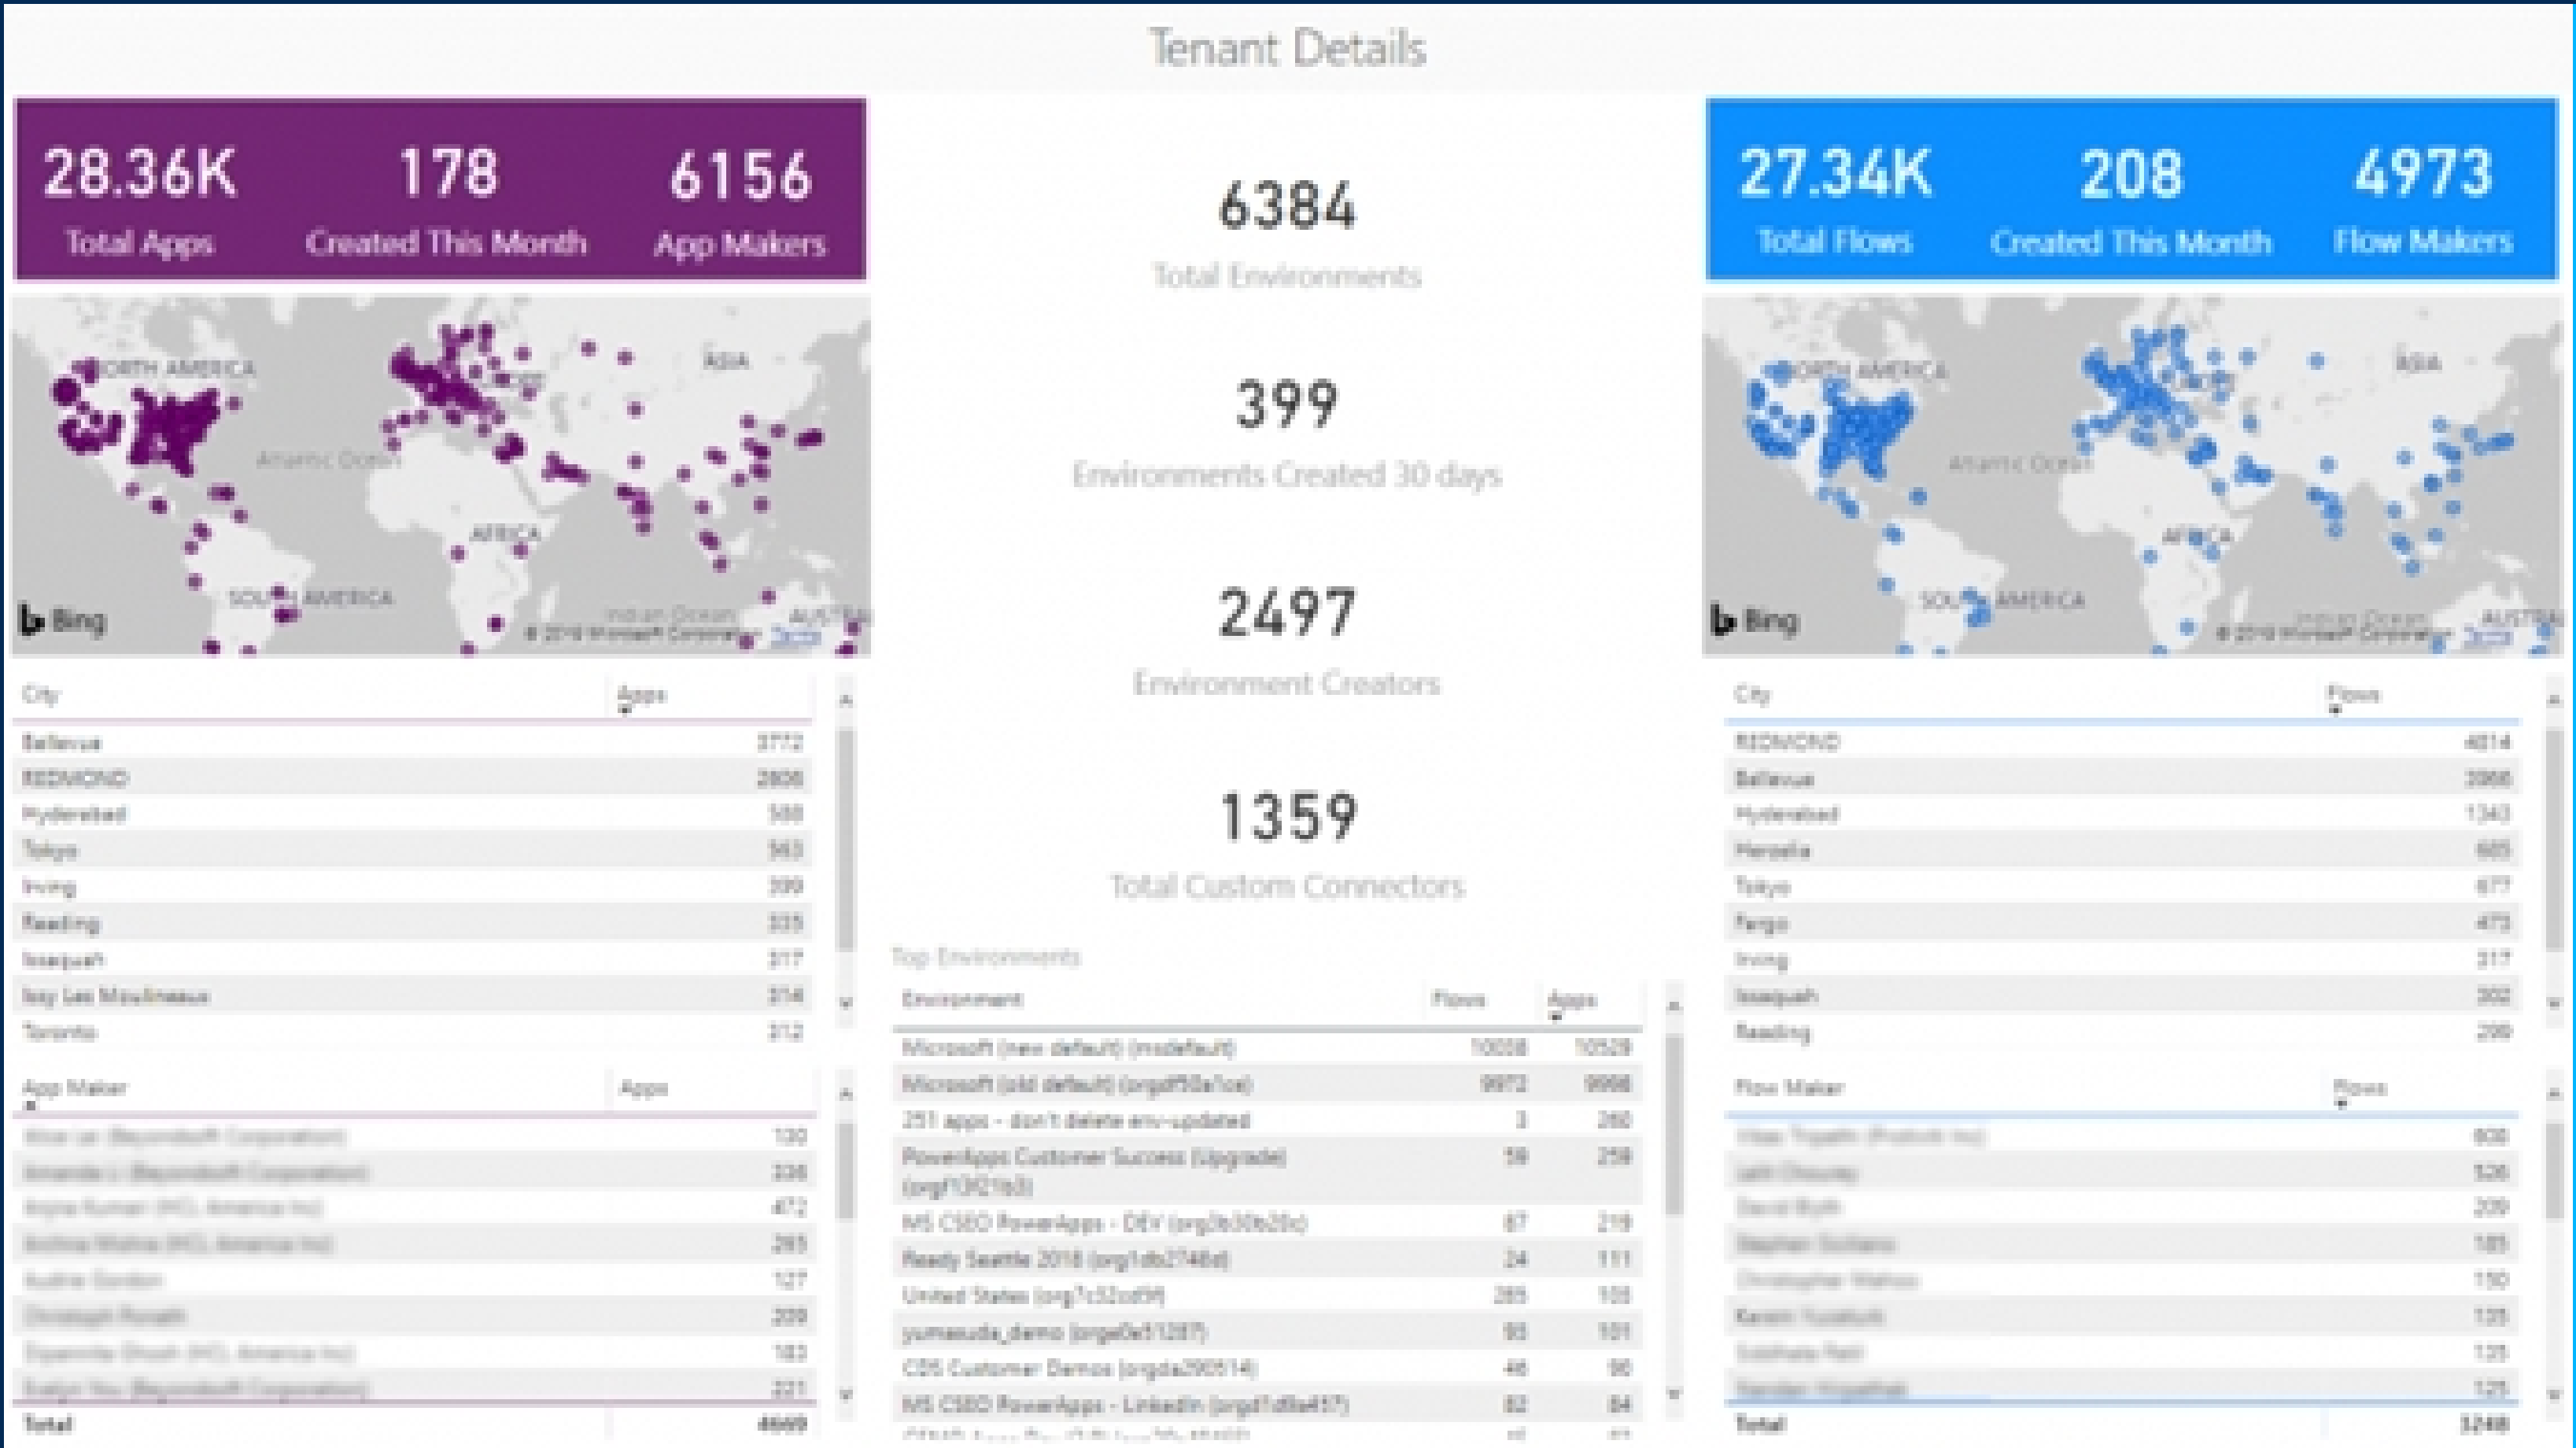

Establishing a Microsoft Power Platform Center of Excellence (CoE) means investing in and nurturing organic growth while maintaining governance and control. For many, the CoE is the first step in fostering greater creativity and innovation across the organization by empowering business units to digitize and automate their business processes, while maintaining the necessary level of central oversight and governance.

Cyclotron is your trusted partner to understand and implement the strategy on how to establish Microsoft Power Platform Center of Excellence (CoE).

## Why CoE?

A CoE is designed to drive innovation and improvement. As a central function it provides standards, consistency, and governance to the organization. In summary, a CoE can be a powerful way for an organization to align around business goals rather than individual department metrics. Readily find answers to burning questions like:

- Who are my top makers?
- Which connectors are being used the most?
- How can I automate welcome email to new makers?
- Which apps/flows are not performing well?
- Are we seeing traffic from not authorized regions?
- Who created/updated apps/flows?
- Who made permission updates?

Cost: \$15K

Duration: 5 days

- **Day 1:** Planning, prep including Power Platform environment set-up and overview of CoE Starter Toolkit
- **Day 2:** Microsoft Power Platform Administration and Governance session
- **Day 3 to 4:** Install and config CoE Starter Tool Kit
