

# Citrix-on-Azure with Cloud Direct

## The partnership to drive your business forward

We partner with world-class technology providers to bring our customers first-class services that meet their ambitious business goals. Which is why we've partnered with both Microsoft and Citrix to bring you Citrix-on-Azure.

Our unique position as a Microsoft Azure Expert MSP and Citrix CSP/CSA means we're able to offer our customers unparalleled end-to-end solutions.

## The business case for Citrix-on-Azure:

### Move from CapEx to OpEx

Take back control of your provisioning with predictable monthly expenditure you can budget for. With no upfront or surprise costs. Spin up new seats as you need them.

### Upgraded Security

With ransomware attacks on the rise and data regulations only getting tighter, that nagging feeling that you're not doing enough to protect your business is getting harder to ignore. But Azure is built from ground up with security in mind. Security is not just an add-on, it's integrated into the core set-up of your Azure environment. Giving organisations at every level, access to enterprise-grade security.

### Reduce admin, increase agility

Simplify your IT and enable it to scale alongside your business. Streamline collaboration processes and remove bottlenecks with centralised resources that can be accessed anytime, anywhere. Easy workflows create intuitive ways of working, sharing documents, reviewing work and accessing knowledge.
