On-Premise to Online

Tisski's on-premise to online service can provide you and your organisation with the support you need in making the move to cloud computing.

By partnering with Tisski in taking this all-important step in the modernisation of your operations, a dedicated team of tech experts will be on hand to help you transition to the Microsoft Azure cloud, where you'll not only benefit from cloud storage, but a whole host of transformative technology to help automate processes, manage data and introduce machine learning.

If you opt to make the move to cloud computing, you can:

- Reduce the cost of operations in comparison to on-premise hosting;
- keep your data safe in a secure, UK-based online environment;
- access everything you need anytime, anywhere;
- and ensure your technology never faces obsolescence.

The Tisski team are experienced in guiding organisations of all sizes through this transition, ensuring the process runs smoothly and causes minimal disruption to day-to-day business activity.

Key Benefits

Ensure documents are kept safe and secure
By opting for leading Microsoft technology, you're placing your trust in a company who invest more than $1 billion in security annually. In addition, their cloud platform, Azure, has more than 90 compliance certifications, evidencing their commitment to keeping your data and documents safe.

Adopt an evergreen platform
Making the move to an 'online first' approach enables you to benefit from access to a platform that's evergreen, meaning you'll always be able to access the latest software and infrastructure from Microsoft in a cost-effective manner. Fully adaptable, you can also scale up to fit your evolving requirements as and when needed.

Make the most of full accessibility
With cloud hosting, you and your employees can access all you need whenever and wherever you please with Microsoft's up-time guarantee, enabling effective collaboration and the prompt delivery of services.
