

SENTIENCE v3.0

Ground-based measurement devices for air quality wherever you need them

Your Benefits

Robust data to design and drive your smart city projects - in real time

Easy integration, installation in less than 30 minutes

Weatherproof and protected against insects and vandalism

High-resolution and high-frequency environmental data

Data digitally available at any time

Features:

- ⚡ Measurement of O₃, NO₂, PM_{2.5}, PM₁₀ and additional environmental parameters including temperature, air pressure and humidity
- ⚡ CE & EMC-certified technology
- ⚡ Modular, plug & play system
- ⚡ Two-stage calibration process adapted to local climatic conditions
- ⚡ Digital data transfer via GSM or LoRaWAN
- ⚡ Data available via API or conveniently on our Data Management Platform
- ⚡ Individual cover design on request
