

A trusted partner in **Technology Transformation**

Timeline: 2-4 weeks

Cost: \$9,995*

TECHTIQ Discovery Package for Cloud Adoption

TECHTIQ is the preferred data analytics, cloud migration, IoT, and cybersecurity platform partner. As a Microsoft Azure Gold Partner, we have worked with numerous local, national, and international customers.

Navigating the technology transformation path seems overwhelming to many organisations. Undoubtedly, there are many unknowns on this journey that will help you fuel growth. Most are unable to innovate fast enough to meet market changes, regulatory compliances, and business objectives. Cybersecurity threats are always on the rise and on-premises data centres are fragile.

With the help of Microsoft Azure, **TECHTIQ** have created a discovery package to help plan and navigate this path, every step of the way and give your business a clear understanding of the opportunities. We will simplify and surface the possibilities that increase work efficiency and deliver the roadmap needed to achieve your technology transformation goals.

The **TECHTIQ** Discovery Package is the go-to solution. As a Microsoft Gold Partner, our staff have expert level Microsoft qualifications, giving you assurance that your objectives will be met.

Deliverables:

As part of the engagement, a comprehensive roadmap will be created which will include:

- 1 Project scope, objectives, and requirements
- 2 Approach solutions
- 3 Engaging key business stakeholders to understand strategic goals
- 4 Migration strategy and project plan
- 5 Replay TECHTiQ's view of your current state
- 6 Structured Q&A to uncover further detail
- 7 Identify key project stakeholders
- 8 Detailed proposal with agreed outcomes including high level ongoing costs
- 9 Project timelines and costs
- 10 Benefits analysis
- 11 Data architecture
- 12 Estimation of CAPEX and OPEX costs
- 13 Production deployment planning

If you have an existing cloud presence:

- 1 Assessment of current infrastructure and architecture against best practise
- 2 Proposed Azure environment and topology if changes are needed

* The price quoted and time required will vary depending on the size of the environment, number of applications to be assessed, amount of existing data and complexity of the current infrastructure.
