(<https://play.google.com/store/apps/details?id=com.cylicium.app.mailinja>)

How It Works

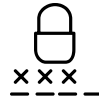

Just Compose

Use the compose message form in Mailinja to securely compose your email and add potential attachments.

And Send

Your message will be encrypted completely OFFLINE on your device and then securely handed over to your email client, you just need to send by using your regular email account.

Passcode Protected

The passcode, which is needed to decrypt the email, will be automatically transferred via Mailinja, either via email or if the recipient is already registered via Mailinja app.

Works For Anyone

The recipient only needs a PDF reader like Adobe Reader and the passcode to open the encrypted email.

Benefits for Recipient

Only PDF Reader Needed

Mailinja is the email encryption solution you've been waiting for. The recipient only needs a PDF reader to open the encrypted email.

Works On Any Platform

A PDF reader like Adobe Acrobat Reader is available for any platform.

No Registration

No registration needed for the recipient. The received passcode is sufficient to decrypt and open the encrypted email.

Why Mailinja?

Encryption protects our data and it protects us. We strongly believe that email encryption is a human right and should be free and easy-to-use for anyone. Furthermore we are annoyed that everyone can claim to be you and can use your email address as sender email address.

Mailinja is the mail encryption solution you've been waiting for. It's secure, easy to use and fast. Simple, stress-free email encryption and legitimization of emails.

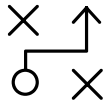

Make a difference and send your emails with Mailinja!
