**Sahara Watira**

# Build apps without compromises with Power Apps

Empower your team to start building and launching apps right away using prebuilt templates, drag-and-drop simplicity, and quick deployment—then roll out continuous improvements as needed. Apps built using Power Apps provide rich business logic and workflow capabilities to transform your manual business operations into digital, automated processes.

## Why Sahara Watira

With an extensive employee experience practice, Watira can help you envision your desired state - one that brings people, data, and applications together in a single customized dashboard. Our team will work with you to understand your priorities, challenges, and culture to design a solution that meet your needs.

Get started today with
**Microsoft Power Apps**

**PowerApps**

- Empower your team to start building and launching apps right away
- Give everyone the power to build the apps they need
- Give everyone the power to build the apps they need

# How Watira can help you in your journey:

Available services depending on your needs and readiness

### Plan

- Migrate and leverage the latest low code applications of the **Microsoft Power Platform** experience with Power Apps to build applications easily
- Building apps with Power Apps helps everyone from business analysts to professional developers work more efficiently together

**PowerApps**

### Implement

- Build an app quickly by using the skills that you already have.
- Connect to the **cloud services** and data sources that you're already using.
- Connect to the cloud services and data sources that you're already using.
- **Power Apps** also provides an extensible platform that lets pro developers programmatically interact with data and metadata, apply business logic, create custom connectors, and integrate with external data.
- Use the built-in **Microsoft Dataverse** to store data and model processes and business logic.

### Measure

- **Deploy and scale Power Apps** to every employee in your organization, on any device.
- Unlock your CDS data, integrate your model-driven forms, views, charts, and embed your Power BI reports or dashboards to create pixel perfect low-code websites for your external users. Those users can access the portal through a variety of standards like Azure AD, LinkedIn, Microsoft Account, Okta, and more.
- Use the built-in Microsoft Dataverse to store data and model processes and business logic. Take advantage of more than 200 connectors to integrate data and systems you already use. Extend **Power Apps** further as a professional developer with custom contro
