

AZURE GOVERNANCE ASSESSMENT – 1 DAY

SOLUTION OVERVIEW

Inde's Azure Governance 1 Day Assessment is a combination of automation tooling and experienced specialist review of your Azure environment at a high level.

The solution comprises of a read-only service principal that is deployed to your Azure management group which allows our tooling to inventory and evaluate relevant areas. The assigned specialist also requires the Reader role in order to provide their component of the review along with the ability to demonstrate findings during the workshop.

Once our governance findings and recommendations report has been generated, this is then presented to your team as a walk through.

For a more thorough governance assessment or ongoing governance management – please get in touch to discuss our offerings.

SCOPE

- Deployment of service principal with read-only access
- Running of assessment tooling and high-level review
- Report generation and presentation
- Removal of customer access/data

COSTS
