# EXPERIENCE

CREATING A SMARTER WORKPLACE

# Win the war for talent in today's **changing workforce.**

Emerging technology and demographic trends are creating new demands amongst the modern workforce.

How can building owners provide more connected and personalised experiences for their occupants?

In this ever-changing environment, building owners need a solution that combines disparate systems into single platform to streamline processes, increase efficiencies, create community and gain occupant knowledge through analytics.

Introducing Willow Experience.

# Drive tenant engagement.
## Gain valuable insights.

Willow Experience provides a seamless, intuitive and enjoyable mobile experience that incorporates all essential elements of the modern workplace into a single mobile application.

Willow Experience connects occupants with base building technology such as access control for doors, lifts and lockers along with access to local cafes, restaurants and even room bookings.

Through Willow Experience, owners can gain vital insights into how their occupants are using the building to inform the space and improve satisfaction.

# More than an app

Willow Experience is more than just a mobile application. The data gathered is integrated into our wider platform and aggregated within your building's digital twin.

In this way, Willow Experience is a future-proof and integrated software solution for your building or portfolio.

# Featured Case Study:
# Insite by Investa

In partnership with Investa Property Group, Willow developed 'Insite'; a release of Willow Experience which connects tenants with essential building services and enables owners to better understand how their buildings are being used. The app has been launched at Investa's flagship Sixty Martin Place building in Sydney and will be rolled out across their Australian portfolio.

## Insite Features:

- Building access
- Carpark access
- Lift calling
- Locker booking and access
- Goods lift and Loading Dock bookings
- Digital visitor management
- News and Events
- Building notifications
- Sustainability information
- E-Commerce services including food and beverage ordering and laundry services
