

Smarter property data.
One location.

Relab removes barriers for property professionals to make smarter, data driven decisions, faster.

Find property that matches your distinct criteria. Search by zoning, connections, size or subdivision suitability. Find comparable properties and analysis your options.

Advanced Property Search

Relab combines over 1 million property insights to give you thousands of distinct, data rich and highly accurate property search results.

World class Mapping

Industry leading mapping solutions combine rich layers, typographical detail and updated infrastructure detail with satellite mapping functionality to bring you world class discovery.

Resource and building consent insights

Understand exactly where new Building and Resource Consents have been granted along with all the finer details of consent applications, including date, costs and dwelling information.

Subdivision Feasibility

Investors, developers and home buyers can quickly assess the potential of any parcel of land anywhere, anytime - and on any device with our industry leading subdivision calculator.

Who is Relab for?

We provide seamless data and insights access for property professionals to more easily transact property dealings. In doing so, we aim to level the playing field when it comes to information access.

Our product is made with these customers in mind:

Property Developers

Property Investors

Real Estate Agents

Property Professionals

Pricing

Our plans start at \$28.95 per user, per month and include pro membership to all our advanced features.
