

Datafeed Name		US Imports BoL			
Update Frequency		Daily			
1	Table Name	Primary Details			
SNo	Column Name	Data Type	Field Type	Sample Values	Description
1	Run Date	string	Actual	13-02-2021	This field contains the date when the shipment was updated in the US AMS(Automated Manifest System) system
2	Actual Date of Arrival	string	Actual	12-02-2021	This field contains the date at which the shipment actually reached a port in the US
3	Estimated Arrival Date	string	Actual	12-02-2021	This field contains the original scheduled date of arrival of the shipment
4	Master Bill of Lading Number	string	Actual	MAEU214337348	This field contains the code representing the master bill of lading, including the 4-character issuer code plus the issuer assigned sequence number, which identifies the shipment
5	House Bill of Lading Number	string	Actual	LGLVB21110785	This field contains the code used to report individual portions of a consolidated shipment
7	Bill of Lading Type	string	Actual	HOUSE BILL	This field contains the Bill of Lading Type for the shipment and must be one of the following: HOUSE BILL REGULAR BILL MASTER BILL IN-BOND AUTOMATED SIMPLE BOL FROB MASTER BOL W/IN-BOND HOUSE FROB MASTER FROB
8	In-bond Entry Type	string	Actual	Immediate Transportation (IT)	This contains the entry type, required for in-bond shipments and must be one of the following: Immediate Transportation (IT) Transportation and Exportation (T/E) Immediate Exportation (IE)
9	Foreign Port of Lading	string	Actual	SHANGHAI, CHINA	This field the foreign port in which cargo was laden on board the conveyance destined to the US
10	Place of Receipt	string	Actual	SHENZHEN, CHINA	This field contains the valid city or country name in which the carrier first took possession of the cargo destined to the U.S.
11	Port of Destination	string	Actual	LONG BEACH, CALIFORNIA	This field contains the in bound port of destination for the shipment
12	Foreign Port of Destination	string	Actual	CARTAGENA ,COLOMBIA	This field contains the foreign port of destination for the vessel
13	Port of Unlading	string	Actual	OAKLAND, CALIFORNIA	This field contains the CBP district/port in which cargo was unladen
14	Is Containerized	string	Derived	CONTAINERIZED	This field tells if the shipment is containerized or bulk (non-containerized) and must be one of the following: CONTAINERIZED NON-CONTAINERIZED
15	Container Load	string	Derived	LCL, FCL	This field contains information if the shipment occupies a full or less than container load.
16	Vessel Name	string	Actual	BARBARA	This field contains the name of the vessel for the shipment
17	Vessel Country	string	Actual	China	This field contains the vessel's country for the shipment
18	Voyage Number	string	Actual	12345	This contains the voyage number of the vessel
19	Manifest Number	string	Actual	45678	This contains the manifest number of the vessel
20	Conveyance ID Qualifier	string	Actual	IMO Number/Lloyds Number	This qualifier code identifies the type of identification provided for the Conveyance and must be one of the following: IMO Number/Lloyds Number Conveyance Name
21	Conveyance ID	string	Actual	9505053	This contains the unique code or name representing the importing conveyance
22	HS Codes	string	Actual	721932, 721922	This field contains the HS Codes for the cargo present in the shipment
23	Estimated HS Codes	string	Estimated	73072900	This field contains the estimated HS Codes for the cargo present in the shipment
24	Product Keywords	string	Derived	ELECTRIC TOOTHBRUSH	This field contains the relevant product identifiers for the cargo present in the shipment

25	Estimated Shipment Value	integer	Estimated	89989.38	This field contains the estimated shipment value in USD for the cargo present in the shipment
26	TEU	integer	Derived	2.5	This field contains the TEU (Twenty-foot Equivalent Unit) quantity for the containerized shipment
27	Manifest Quantity	integer	Actual	14	This field contains the value representing the total number of pieces on the bill of lading. This value must be greater than zero
28	Manifest Quantity Unit	string	Actual	Package	This field contains the unit of measurement of manifest quantity
29	Total Weight	integer	Actual	14235	This field contains the total weight of the shipment
30	Total Weight Unit	string	Actual	kg	This field contains the unit of measurement of the total weight for the shipment
31	Measurement	string	Actual	2063	This field contains the value representing the shipment's volume
32	Measurement Unit	string	Actual	Carton	This field contains the representing the unit of measurement of volume of the shipment

2 Table Name		Party Details			
SNo	Column Name	Data Type	Field Type	Sample Values	Description
1	Run Date	string	Actual	13-02-2021	This field contains the date when the shipment was updated in the US AMS(Automated Manifest System) system
2	Actual Date of Arrival	string	Actual	12-02-2021	This field contains the date at which the shipment actually reached a port in the US
3	Master Bill of Lading	string	Actual	MAEU214337348	This field contains the code representing the master bill of lading, including the 4-character issuer code plus the issuer assigned sequence number, which identifies the shipment
4	House Bill of Lading	string	Actual	LGLVB21110785	This field contains the code used to report individual portions of a consolidated shipment
5	Shipper Standardised Name	string	Derived	Walmart	This field contains the clean standardised name of the shipper of the shipment
6	Shipper Name	string	Actual	Walmart	This field contains the name of shipper as it appears in the shipment
7	Shipper Address	string	Actual	Wal-Mart, 125 Yangpu District, China, 200000	This field contains the address of the shipper of the shipment
8	Shipper Country	string	Derived	China	This field contains the country of the shipper of the shipment
9	Shipper State/Province	string	Actual	New York	This field contains the state or province of the shipper of the shipment
10	Shipper City	string	Actual	New York	This field contains the city of the shipper of the shipment
11	Shipper Zip Code	integer	Actual	10012	This field contains the zip code of the shipper of the shipment
12	Consignee Standardised Name	string	Derived	Walmart	This field contains the clean standardised name of the consignee of the shipment
13	Consignee Name	string	Actual	Walmart Inc	This field contains the name of consignee as it appears in the shipment
14	Consignee Address	string	Actual	702 SW 8th St, Bentonville	This field contains the address of the consignee of the shipment
15	Consignee State	string	Actual	Texas	This field contains the state or province of the consignee of the shipment
16	Consignee City	string	Actual	Bentonville	This field contains the city of the consignee of the shipment
17	Consignee Zip Code	integer	Actual	72712	This field contains the zip code of the consignee of the shipment
18	Notify Party Name	string	Actual	Walmart	This field contains the name of the notify party of the shipment
19	Notify Party Address	string	Actual	702 SW 8th St, Bentonville	This field contains the address of the notify party of the shipment
20	Notify Party Country	string	Actual	United States	This field contains the country of the notify party of the shipment
21	Notify Party State/Province	string	Actual	New York	This field contains the state or province of the notify party of the shipment
22	Notify Party City	string	Actual	New York	This field contains the city of the notify party of the shipment
23	Notify Party Zip Code	integer	Actual	10013	This field contains the zip code of the notify party of the shipment
24	Secondary Notify Party	string	Actual	702 SW 8th St, Bentonville	This field contains the name and address of the secondary notify party of the shipment
25	Carrier Name	string	Derived	Maersk	This field contains the name of the carrier of the shipment
26	Carrier SCAC Code	string	Actual	MAEU	This contains the Standard Carrier Alpha Code (SCAC) code of the carrier
27	VOCC	string	Derived	Maersk	This field contains the name of the Vessel-Operating Common Carrier (VOCC) of the shipment
28	VOCC SCAC Code	string	Derived	MAEU	This field contains the Standard Carrier Alpha Code (SCAC) of Vessel-Operating Common Carrier (VOCC) of the shipment

29	NVOCC	string	Derived	Christal Lines	This field contains the name of Non-Vessel Operating Common Carrier (NVOCC) of the shipment
30	NVOCC SCAC Code	string	Derived	CHSL	This field contains the Standard Carrier Alpha Code (SCAC) of Non-Vessel Operating Common Carrier (NVOCC) of the shipment

3 Table Name		Container Details			
SNo	Column Name	Data Type	Field Type	Sample Values	Description
1	Run Date	string	Actual	13-02-2021	This field contains the date when the shipment was updated in the US AMS(Automated Manifest System) system
2	Actual Date of Arrival	string	Actual	12-02-2021	This field contains the date at which the shipment actually reached a port in the US
3	Master Bill of Lading	string	Actual	MAEU214337348	This field contains the code representing the master bill of lading, including the 4-character issuer code plus the issuer assigned sequence number, which identifies the shipment
4	House Bill of Lading	string	Actual	LGLVB21110785	This field contains the code used to report individual portions of a consolidated shipment
5	Container Number	string	Actual	MSKU4359020	This field contains the container number associated with the bill of lading. This container number reflects the number exactly as it physically appears on the container. For non-containerized shipments the value of this field would be "NC" or "NC NONE"
6	Seal Number	string	Actual	ML-TH6122645	This field contains the exporter/carrier seal number associated with the container
7	Marks and Numbers	string	Actual	CHICKEN OF THE SEA	This field contains the description of the symbols and markings that are on the outside of the packaging of the shipment
8	Equipment Description	string	Actual	Container	This field contains the type of container or equipment used for the shipment
9	Load Status	string	Actual	Loaded	This field contains the loaded condition of the transportation equipment and must be one of the following: Empty Loaded
10	Type of Service	string	Actual	Break Bulk	This field contains the value specifying the extent of transportation service required and must be one of the following: Break Bulk Container Station Container Yard House to House Headload or Devanning House to Pier Mixed Delivery NonContainerized Pier to House Pier to Pier Roll on Roll Off
11	Container Length	integer	Actual	40 ft 0 in	This field contains the length (in feet and inches) of container ordered or used to transport the shipment
12	Container Height	integer	Actual	9 ft 7 in	This field contains the height (in feet and inches) of container ordered or used to transport the shipment
13	Container Width	integer	Actual	8 ft 2 in	This field contains the width (in feet and inches) of container ordered or used to transport the shipment
14	Container Type	string	Actual	4FR0	This field contains the type of container container ordered or used to transport the shipment

4 Table Name		Cargo Description			
SNo	Column Name	Data Type	Field Type	Sample Values	Description
1	Run Date	string	Actual	13-02-2021	This field contains the date when the shipment was updated in the US AMS(Automated Manifest System) system
2	Actual Date of Arrival	string	Actual	12-02-2021	This field contains the date at which the shipment actually reached a port in the US

3	Master Bill of Lading	string	Actual	MAEU214337348	This field contains the code representing the master bill of lading, including the 4-character issuer code plus the issuer assigned sequence number, which identifies the shipment
4	House Bill of Lading	string	Actual	LGLVB21110785	This field contains the code used to report individual portions of a consolidated shipment
5	Container Number	string	Actual	1	This field contains the container number associated with container of the bill of lading.
6	Description Sequence	string	Actual	1	This contains the container's cargo description sequence number
7	Piece Count	string	Actual	19000	This field contains total number of pieces in the container being described for the shipment
8	Description	string	Actual	Battery	This field contains the description of the cargo of the shipment
9	Harmonized Number	string	Actual	860900	This field contains code located in the Harmonized Tariff Schedule of the United States Annotated that represents the tariff number or Harmonized Tariff Schedule B that represents the commodity export
10	Harmonized Value	string	Actual	9800	This field contains the value of the cargo associated with the Harmonized Number in the shipment in USD
11	Harmonized Weight	string	Derived	4900	This field contains the weight of the cargo associated with the Harmonized Number in the shipment in USD
12	Harmonized Weight Unit	string	Derived	Kilograms	This field contains the unit for the weight of the cargo associated with the Harmonized Number in the shipment in USD

5 Table Name		Hazmat Description			
SNo	Column Name	Data Type	Field Type	Sample Values	Description
1	Run Date	string	Actual	13-02-2021	This field contains the date when the shipment was updated in the US AMS system
2	Actual Date of Arrival	string	Actual	12-02-2021	This field contains the date at which the shipment actually reached a port in the US
3	Master Bill of Lading	string	Actual	MAEU214337348	This field contains the code representing the master bill of lading, including the 4-character issuer code plus the issuer assigned sequence number, which identifies the shipment
4	House Bill of Lading	string	Actual	LGLVB21110785	This field contains the code used to report individual portions of a consolidated shipment
5	Serial Number	string	Actual	1	This field contains the serial number associated with container of the bill of lading.
6	Hazmat Sequence Number	integer	Actual	01, 02, 0102	This field contains the HAZMAT Sequence Number for the shipment
7	HAZMAT Code	string	Actual	3538	This field contains the code representing the identification number assigned to the hazardous material in the shipment
8	HAZMAT Class	string	Actual	2.2	This field contains the code representing the hazardous class or division designated for the material in the International Maritime Dangerous Goods (IMDG) code
9	HAZMAT Code Qualifier	string	Actual	K	This field contains the code that describes the hazardous material class
10	HAZMAT Contact	string	Actual	1-703-527-4897	This field contains name and/or phone number of the person or department to contact in case of an emergency for the shipment
11	HAZMAT Flash Point Temperature	string	Actual	-80	This field contains the lowest temperature at which the vapor of a hazardous combustible liquid will ignite in the air
12	HAZMAT Flash Point Temperature Negative Ind	string	Actual	N	This field contains the code of N when a flashpoint temperature is negative, that is, below 0 degrees Centigrade/Celsius
13	HAZMAT Flash Point Temperature Unit	string	Actual	CE	This field contains the basic unit of measurement (UOM) for the flashpoint temperature. This is always CE = Degrees Centigrade/Celsius
14	HAZMAT Description	string	Actual	AEROSOLS - CLEANER	This field contains the proper shipping name of the material designated as hazardous. Also provides any special instructions, and/or the phone number, if applicable
15	HAZMAT Classification	string	Actual	AEROSOLS (1L)	This field contains the description of hazardous material classification, division, or label requirements
