

# 1ID Platform for EDU

Telelink Business Services is the biggest and most modernized System Integrator in Bulgaria and one of the largest in the CEE region. The company is a proven solutions provider, committed to continuous improvement and delivery of innovative outcomes while taking care of the environment and society.

TBS's main ambition and strength is its successful education engagements, focused on creating reliable and effective digital transformation for Bulgarian students, teachers and parents.

## WHAT WE OFFER

TBS built a single-entry point site hosted in Microsoft Azure, utilizing Azure Active Directory security features and managing the complete lifecycle of the student profile – from user creation to graduation. 1ID platform incorporates Azure Active Directory B2C to enable secure access for parents.

Our solution is based on open-source software, Azure App Service and Azure Kubernetes Service. It eases the container management process without compromising the security and governance aspect of the work. TBS implemented Azure Functions to enable security triggers and scale optimization.

TBS provides safe and secure access to all educational platforms and services offered by the Ministry of Education (MoE) and its trusted partners via a single sign-on.

Each profile on the MoE platform is created automatically, which guarantees users anonymity and third parties' inability to access their personal data.

To improve the learning and teaching experiences, TBS integrated 100+ internal MoE systems and external education applications using Microsoft Teams platform.

1ID Platform constitutes a modern and secure digital educational environment based on cloud technologies that kindergartens, schools and universities can use for their educational needs.

## WHAT OUR CUSTOMERS ARE SAYING

**“When it comes to online education, the single identity works well, and we’re very pleased. We use it to carry our professional learning for teachers, teacher association meetings, school board meetings, and even for school admission processes – everything is channeled through edu.mon.bg. The platform also integrates e-textbooks, an incredibly convenient complimentary. Teacher-led content, apps, student work – everything is gathered in one place!”**

**Kina Kotlarska, Principal, Emilian Stanev K-12 School, Veliko Tarnovo**
