

# Stackhero for GitLab cloud

Stackhero for GitLab cloud is a hosted and managed solution, configured to collaborate easily and securely.

Get started in just 2 minutes.

[Start now →](#)

Stackhero is a  **European** company, compliant with GDPR, with servers in  **Europe** and  **USA** depending on your preference!

## Business centric

Start your GitLab server in just 2 minutes and empower your team instantly!

Focus on your business, not on your infrastructure anymore.

## Insanely performant

Powered by high performances CPUs and SSD disks, we configure GitLab to get a blazing fast solution.

You will be amazed by the performances of your messenger.

Connections are encrypted by the all new ECDSA and TLS 1.3 technics, increasing security and speed.

You don't have to choose anymore between security or speed, you get both of them.

## Updatable in a click

We provide services updates, every time it is necessary.

You just need a click to be up-to-date and get the last release and features of Gitlab.

## Unlimited users, repositories and CI/CD

We don't add any soft limitations, like on the number of users, repositories, transfers and CI/CD time your server can handle.

You can finally get all the power from your GitLab server.

## Unlimited emails

We offer a dedicated email server with your service.

Receive unlimited emails notifications, regardless the size of your team!

## Billing per hour

Create and delete GitLab as a service when you want, you'll be billed per hour of use and receive a single invoice, each month, with all the details.

## Highly scalable

Choose your configuration up to 16 vCPUs and 64 GB of RAM and scale it as your business grows.

## Secured backups

Your data are automatically backed up in an atomic way and certified every 24 hours to a secured vault where it can be stored for up to 3 months.

Start your GitLab in 2 minutes.  
Collaborate right now.
