

# With the Frontline Application *digitize your field workers!*

## What is Frontline?

The “CloudCan Frontline” application we developed for Microsoft Teams Platform is designed to digitize field workers and blue-collar workers in production. With this digital platform, which acts as a bridge between the field and headquarters of companies, you can increase the efficiency of your business with technology! The platform is an all-in-one solution and there are 4 different modules in the same application.

### → What to do?

#### Education & Orientation

- Create New Lesson
- Take Quiz
- Watch Lesson

#### Checklist

- Create Daily Checklist
- Users can solve checklist everyday
- Daily checklist report

#### Check In & Check Out

- Create new workspace
- Workspace qr scanner
- Daily check-in report

#### User Management

- Bulk users can import from excel

### → Why Frontline?

#### Learn

Here, we can upload videos of users such as training, orientation and work safety, follow them on the admin screen, see how many times they have been watched and whether they have finished until the end, make quizzes and report them. Quiz can come from a pool randomly.

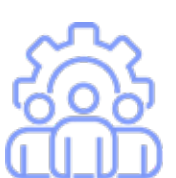

#### Checklist

You can check lists at the store and factory, and view the reports of the checklists.

#### Check In & Check Out

This is for checking the store entry and exit timetable reports and what needs to be done on entry and exit.

#### User Management

It is for managing entry and exit tracking, access management to the company. Field workers change. It was made to speed it up.
