DATA GOVERNANCE PROOF OF CONCEPT WITH NEAL ANALYTICS

Program Expected Outcomes

At the end of the 10-week engagement, customers will receive a functional POC demonstrating the capabilities of Microsoft Purview in a governance context.

Additionally, data governance experts at Neal Analytics will work with customer stakeholders to:

- Assess the customer organization's data governance maturity
- Identify areas of improvement in governance policies
- Demonstrate the value of data lineage and data cataloging tools for governance
- Educate stakeholders on data governance best practices
- Create a roadmap for scaling out data governance
- Prepare POC for production

Frequently Asked Questions

Why is this POC needed?

Data governance is complicated. Trying to implement data governance policies without a well-planned approach can lead to unexpected challenges and complexity. Additionally, there are numerous tools available to support data governance. This POC can help cut through the confusion by helping ensure an organization's data governance roadmap is following best practices and providing a thorough assessment of a top data governance tool for Microsoft Azure customers.

I have a multi-cloud environment. Do I need Microsoft Purview?

The short answer is maybe. There are many tools and solutions available that can provide similar functionality as Microsoft Purview, but many of these require integration with Microsoft Purview to access the integrations provided by Purview. If you think this situation might apply to you, [contact us](#) and we can help you determine whether Purview makes sense for you.

Why Neal Analytics?

Neal Analytics is a cloud, data, and AI Microsoft Gold consulting partner supporting data-driven transformation initiatives from data strategy to solution design, architecture, development, operationalization, and support. Our expertise spans across migration and modernization, data science, AI/ML, IoT, edge computing, BI, application development, & RPA.

Our partnership with Microsoft and deep familiarity with data governance and Microsoft Purview has enabled us to deliver multiple data modernization and data governance implementations leveraging Microsoft Purview.
