Trusted security expertise to help you protect your business

Securing Identities & Access, Defending against threats with SIEM plus XDR.

Constantly evolving and increasing your security posture through specialist guidance and advice.

See what customers are saying:

"Microsoft and Centrality have together delivered on this requirement. I'd strongly advise any and all UK-based businesses to consider taking the very same approach."

- Simon, Charlie Higham's

WHAT WE OFFER

The Security Assurance Programme from Centrality provides specialist help, augmenting your team with access to security expertise. Working in collaboration with your team we provide expert guidance to drive a continual improvement in your organisation security posture.

The programme provides comprehensive guidance across People, Technology and Processes helping you to mitigate the risk of compromise from increasingly sophisticated cyber criminals.

With Phishing attacks, and malware through email being the largest attack vectors we support you to educate your staff and conduct routine simulated attacks to drive greater awareness. We will ensure your Security toolsets are correctly configured, to provide the best coverage and protection – and work with you to continually refine. We will review your processes, policies, reviewing alerts and the latest threat intelligence to ensure your security posture does not stagnate, and evolves over time.

Security Assurance Programme

Security Incident Reviews

Monthly reviews to discuss security related incidents, the threat landscape and implement recommendations to drive continual posture improvement with a Certified Security expert.

Public Facing Website Check

An audit of your environment to validate security posture, encompassing certificates, patching and encryption standards to ensure you remain protected.

Security Improvement Plan

Review of Microsoft 365 portals to validate security posture, provide recommendations & specialist guidance. Provide insight to security trends, product enhancements & automated reporting options.

Security Policies & Coverage

Validation of your security policies to ensure all users are appropriately covered and ensure these evolve to accommodate the changing threat landscape.

Attack Simulation

Simulated attack testing of your staff to validate and report on their security their awareness, providing ongoing relevant and targeted security materials to help you educate staff.

Azure Sentinel SIEM

Configuration and ongoing refinement of your security policies to enable semi-automated remediation against a defined set of security triggers to alert on suspicious behaviours.

With the continually evolving and increasingly sophisticated threat landscape, many businesses need an affordable solution to enable them to maximise their security posture ensuring peace of mind. Designed to work in partnership with your team not replace them that delivers an increase in your security posture.
